The Spring 2011 Saturday Academy will focus on Activism, Co-curricular activities, Transfer preparation, Internships, Opportunities for graduate school, and Networking (ACTION). Taking ACTION to enhance your academic experience both at the community college and once you have transferred will provide you with tools and skills to engage in scholarly pursuits while staying connected to our communities. Come and dialogue with a variety of speakers who will discuss their work in the community and the academy. The workshops will include panels on non-profit organizations, internships, research opportunities, summer programs, study abroad and graduate preparations programs. Select workshops will focus on opportunities in the sciences.
