Administrative Regulation

ENVIRONMENTAL SUSTAINABILITY

In the spirit of striving to provide leadership and resources to the community and our students, the college is committed to the following goals:

- Nurturing environmental stewardship and environmental literacy across the curriculum
- Purchasing environmentally friendly and energy-efficient products and equipment, including the purchase of “Energy Star” equipment wherever available.
- Reducing greenhouse gas emissions at the college
- Improving energy efficiency on campus
- Minimizing generation of solid waste
- Using recycled and recyclable material
- Accessing renewable energy sources
- Reducing student and staff commuting
- Regularly measuring and assessing our performance towards these goals
- Developing administrative and training procedures in conformity with this policy
- Meeting state mandates for recycling of waste products.
