Materials making up *Campus Profile 2011* were collected, tabulated, analyzed, and formatted by the Research & Planning Unit staff with the assistance of various campus units, especially Information Technology Systems.

## PREFACE

The *Campus Profile* is designed to help faculty, staff, and students understand the college's diverse operations and make informed decisions. The publication is organized around the statewide accountability model. It is the intent of Research & Planning to incorporate accountability reports mandated by the federal and state governments into this annual publication, as such requirements develop.

The *Campus Profile* has had a recent change in organization. Before 2008, the first section profiled the community and local school districts. Because more information about the community has become available in recent years, this section has now been separated into a new report, the *Community Profile*, also published by Research & Planning. The *Campus Profile* is now focused on internal data about Glendale Community College while the *Community Profile* focuses on community and service area information.

Other recently added features of the Campus Profile include a summary of statewide ARCC (Accountability Reporting for the Community Colleges) indicators on pages 46-50, a discussion of CCSSE (Community College Survey of Student Engagement) results on pages 21-22, and a section on incoming credit students on pages 14-15.

This publication tends to focus on relatively short time periods, typically three years, in reporting information. In some cases, longer time periods are reported when deemed especially useful. We have made additions and deletions to the information presented each year

and will continue to do so as we receive your feedback.

Additional information, including data from previous years, is available on the Research & Planning web site, located at <http://research.glendale.edu>. The web site includes most of the data available in the *Campus Profile* with extended historical data, and also includes additional features, including an enrollment history and reports available from Research & Planning.

## 1.01. Enrollment & Demographics

### 1.01.01. Credit & Noncredit Enrollment Trends

Historically, annual enrollment has followed cycles of growth and decline. The last peaks were in 1991-1992, 2002-2003, and 2008-2009. With economic downturns, demand for classes tends to increase but state funding tends to decrease, resulting in class cuts and fewer enrollments.

**Figure 1-1. Credit & Noncredit Headcount Enrollment, Academic Years**

source: GCC MIS data submissions

The table below shows student enrollment by headcount and full-time equivalent students (FTES). Headcount means that each student is counted only once, no matter how many times that student enrolls in classes across the academic year. Full-time equivalent students (FTES) is a measure that counts student contact hours (525 contact hours is considered 1 FTES). California community colleges receive apportionment funding from the state based on reported FTES.

**Figure 1-2. Student Enrollment by Academic Year**

	2008-2009	2009-2010	2010-2011
<b>Student Headcount</b>			
Credit	24,255	24,272	22,501
Noncredit	13,455	12,638	9,597
Total Headcount	37,416	36,714	31,233
<b>Full-Time Equivalent Students (FTES)</b>			
Credit	15,339	15,704	13,974
Noncredit	4,253	4,193	2,700
Total FTES	19,592	19,897	16,674

source: GCC MIS data submissions and CCFS-320 Apportionment Reports

Fall semester enrollment has showed the same pattern as annual enrollment and tends to be higher than Spring semester enrollment.

**Figure 1-3. Headcount Enrollment, Fall Semesters**

Category	Fall 2008		Fall 2009		Fall 2010	
Credit Headcount						
Full-Time	5,787	36%	6,182	37%	6,322	41%
Part-Time	10,190	64%	10,384	63%	9,251	59%
Total Credit	15,977	100%	16,566	100%	15,573	100%
Noncredit Headcount	7,517		7,533		6,010	

source: GCC MIS data submissions

### 1.01.02. Credit Student Demographics

Mirroring a general trend in higher education, GCC serves more female students than male students. The ratio has been close to 60% female to 40% male since the mid 1990s. For students age 21 and younger, the ratio is close to 50/50. For older students, female students outnumber male students.

**Figure 1-4. Gender of Credit Students**

Gender	Fall 2008		Fall 2009		Fall 2010	
Male	6,833	43%	7,261	44%	6,791	44%
Female	9,021	56%	9,180	55%	8,638	55%
Unknown	123	1%	125	1%	144	1%
Total	15,977	100%	16,566	100%	15,573	100%

source: GCC MIS data submissions

**Figure 1-5. Age of Credit Students**

Age Group	Fall 2008		Fall 2009		Fall 2010	
20 & Under	6,559	41%	6,686	40%	6,378	41%
21 to 25	3,864	24%	3,944	24%	3,662	24%
26 to 30	1,781	11%	1,913	12%	1,735	11%
31 to 50	3,112	19%	3,315	20%	3,094	20%

Mean Age	26.2		26.4		26.4	
Median Age	22.0		22.0		22.0	

source: GCC MIS data submissions

The graph below shows the age distribution of credit students. Although the average age of students is 26 years, the college serves relatively few students who are 26 years old. Because the distribution is skewed, the median age (22 years) is a more accurate estimate of the student population's age. About 40% of all credit students are under age 21.

**Figure 1-6. Age Distribution of Credit Students by Gender, Fall 2010**

source: GCC MIS data submissions

The ethnic distribution of credit students changed dramatically with the waves of immigrants to Glendale in the 1980s. The percentage of credit students of Armenian origin has increased from 29% to 34% in the past six years; the percentage of credit students who are Caucasian students of European origin ("Anglos") has decreased in the same time period.

**Figure 1-7. Ethnicity of Credit Students**

Ethnicity	Fall 2008	Fall 2009	Fall 2010
Caucasian/European/Anglo	15%	14%	11%
Caucasian/Armenian	34%	36%	34%
Latino/Hispanic	23%	23%	22%

Filipino	5%	4%	4%
Black/African American	3%	3%	3%
American Indian	0%	0%	0%
Other	5%	5%	4%
Unknown	4%	6%	14%
Total	15,977	16,566	15,573

source: GCC MIS data submissions

source: GCC MIS data submissions and PI\_REC database

Evening classes are those scheduled to begin at 4:30 p.m. or later. About one-third of credit students take both day and evening classes. About one-fifth take evening classes only. A small percentage do not take any classes that are scheduled in the day or evening; for these students, all their credit classes are online classes or do not have regularly scheduled meeting times (e.g., independent study classes).

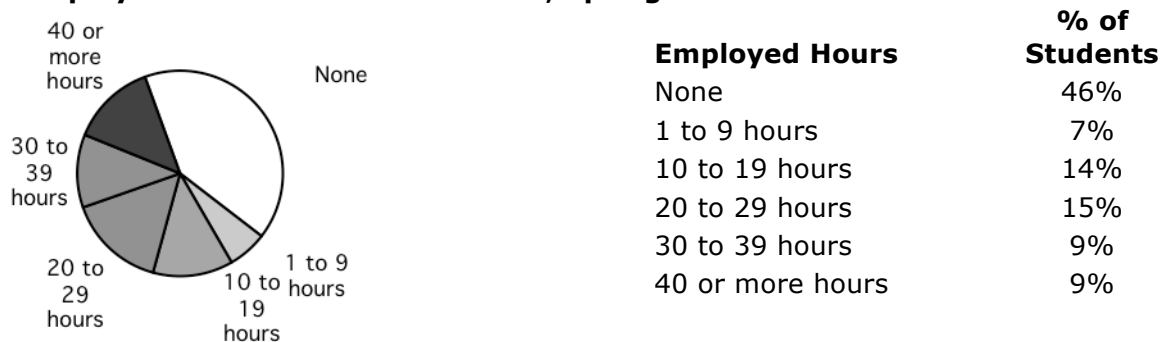

**Figure 1-8. Program (Day, Evening, or Both) of Credit Students**

Program	Fall 2008		Fall 2009		Fall 2010	
Day Classes Only	7,371	46%	7,703	46%	7,025	45%
Evening Classes Only	3,465	22%	3,183	19%	3,129	20%
Both Day and Evening	4,762	30%	5,333	32%	5,063	33%
Neither Day nor Evening	379	2%	347	2%	356	2%
Total	15,977	100%	16,566	100%	15,573	100%

source: GCC MIS data submissions

According to student surveys, about 54% of credit students worked in 2011, representing a decline from about 70% in 2008. About 9% worked at least 40 paid hours per week, and about 24% worked between 20 and 39 paid hours per week. About 3% of credit students (450 per semester) are full-time students and work at least 40 hours per week. As the line graph on the next page shows, the percentage of credit students working zero hours per week has increased substantially since 2007, while the percentage working 40 or more hours per week has decreased substantially.

**Figure 1-9. Employed Hours of Credit Students, Spring 2011**

source: Spring Student Survey

Most credit students (about 67%) are United States citizens. About 17% are permanent residents. The percentage of permanent residents increased from the mid 1980s through about 1996, then began to decrease.

**Figure 1-10. Citizenship/Visa Status of Credit Students**

Citizenship/Visa Status	Fall 2008		Fall 2009		Fall 2010	
	Count	Percentage	Count	Percentage	Count	Percentage
U.S. Citizen	10,629	67%	11,160	67%	10,363	67%
Permanent Resident	2,469	15%	2,484	15%	2,717	17%

**Figure 1-11. Number of AB 540 Credit Students**

AB 540 students are nonresident immigrants who have graduated from a California high school and whose nonresident tuition is waived. The graph below shows the number of AB 540 credit students in Fall semesters.

source: GCC PeopleSoft student system

GCC serves about 500 international students every Fall semester, nearly 600 every academic year. The table below shows the birth countries of international students. The largest groups of international students are from Japan and South Korea.

**Figure 1-12. Countries of Birth of International Students**

Country	Fall 2008		Fall 2009		Fall 2010	
	Count	Percentage	Count	Percentage	Count	Percentage

Mean Units	8.8	8.9	10.3	6.4	6.4	7.2
Median Units	9.0	9.0	9.0	6.0	6.0	7.0

source: GCC MIS data submissions

Information about credit students is collected by the annual Spring Student Survey. The following graph shows student language (the percentage of credit students who learned English as their first language) and origin (the percentage of credit students born in the United States). About 50% of credit students were born in the United States and nearly 40% learned English as their first language.

**Figure 1-14. Credit Student Language and Origin**

source: Spring Student Surveys

The next graph shows the percentage of credit students with dependent children, according to annual student surveys. In 2011, 14% of credit students had dependent children.

**Figure 1-15. Credit Students with Dependent Children**

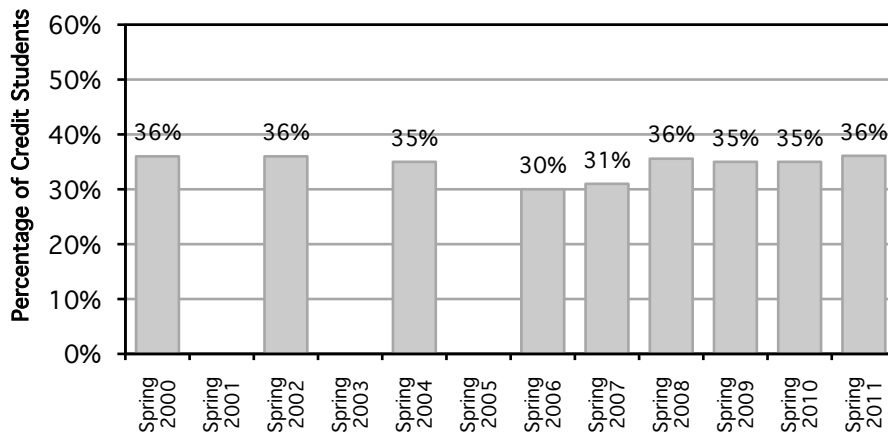

source: Spring Student Surveys

The graph below shows the percentage of credit students reporting that they are first-generation college students. The annual survey asks about the education status of students' parents. A student is counted as a first-generation college student if neither parent attended college. Note that in other contexts, first-generation sometimes refers to a student if neither of his or her parents graduated college. It is important to note that colleges inside the United States are not separated from colleges outside the United States in this survey question, so first-generation status is not an estimate of the percentage of students unfamiliar with higher education in the U.S. Additionally, students are able to select an "I don't know" option if they are unaware of their parents' education status. Students selecting "I don't know" are not included in the percentage calculation; the percentage is based on credit students who know about their parents' education level.

Using this definition of first-generation status, approximately 36% of GCC credit students in 2011 were first-generation college students.

**Figure 1-16. First-Generation Credit Students**

### 1.01.03. Noncredit Student Demographics

In 2007-2008, the enrollment system for continuing education (noncredit) courses changed. A standard online application was required for the first time in 2007-2008 and a noncredit student ID was assigned to each student. This improved the college's ability to track noncredit students. It also reduced the number of students of "unknown" gender, age, and ethnicity starting in Fall 2007.

The gender difference in the noncredit student population is more extreme than that in the credit student population. Female students in the noncredit program outnumber male students by a ratio of about 70% to 30%.

**Figure 1-19. Gender of Noncredit Students**

Gender	Fall 2008		Fall 2009		Fall 2010	
Male	2,400	32%	2,478	33%	2,058	34%
Female	5,117	68%	5,051	67%	3,799	63%
Unknown	0	0%	0	0%	153	3%
Total	7,517	100%	7,529	100%	6,010	100%

source: GCC MIS data submissions

Noncredit students tend to be older than credit students. The median age of noncredit students was 43 years in Fall 2011, compared to 22 years for credit students. The mean age of noncredit students has decreased from 48 years in 1995 to 45 years in 2011.

**Figure 1-20. Age of Noncredit Students**

Age Group	Fall 2008		Fall 2009		Fall 2010	
20 & Under	531	7%	488	6%	423	7%
21 to 25	530	7%	596	8%	475	8%
26 to 30	687	9%	657	9%	517	9%

Median Age	42.0		43.0		43.0	

source: GCC MIS data submissions

**Figure 1-21. Age Distribution of Noncredit Students by Gender, Fall 2010**

source: GCC MIS data submissions

The ethnicity of the noncredit population parallels that of the credit population. Armenian students make up over 40% of noncredit students, and Caucasian students of European descent (“Anglos”) make up about 20%. In 2009, the method of collecting and reporting student ethnicity changed to include multiple ethnicities. The following table shows estimated percentages of students in each ethnic category for comparison to previous years.

**Figure 1-22. Ethnicity of Noncredit Students**

Ethnicity	Fall 2008	Fall 2009	Fall 2010
American Indian	0%	0%	1%
Asian/Pacific Islander	8%	9%	9%
Black/African-American	1%	1%	1%
Caucasian/Anglo	18%	17%	20%
Caucasian/Armenian	43%	44%	45%
Latino/Hispanic	22%	21%	15%
Filipino	3%	3%	3%
Other	4%	4%	5%
Total	7,517	7,529	6,010

source: GCC MIS data submissions, GCC PeopleSoft student system

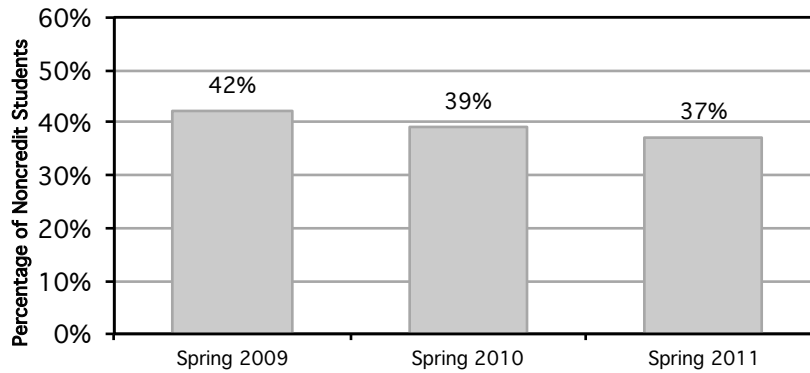

The graph below shows student survey data about the percentage of noncredit students who were born in the United States and who learned English as their first language. Most noncredit students (approximately 75% to 80%) were born outside the United States and are native speakers of a language other than English. The primary languages other than English that are spoken in noncredit students’ homes are Armenian (42% of noncredit students) and Spanish (11%).

**Figure 1-23. Origin and Language of Noncredit Students**

## 1.02.02. Financial Aid

Annually, between 40% and 50% of credit students receive some form of financial aid. The most frequently used category of financial aid is the Board of Governors (BOG) waiver, which waives enrollment fees and is available to California residents demonstrating financial need.

**Figure 1-28. Financial Aid Awards**

Award Category	2007-2008		2008-2009		2009-2010	
	Students	Amount	Students	Amount	Students	Amount
Pell Grants	4,605	\$12,109,162	4,982	\$14,658,570	6,261	\$21,243,196
Federal SEOG	1,824	\$483,600	797	\$267,575	840	\$297,300
EOPS Grants	1,067	\$497,275	1,574	\$742,701	1,492	\$534,579
Student Loans	296	\$888,788	335	\$1,035,101	481	\$1,550,828
Federal Work Study	374	\$711,388	266	\$494,019	323	\$636,176
BOG Waivers	8,969	\$3,088,160	9,896	\$3,417,060	11,596	\$3,959,460

### 1.02.03. Student Access to Technology

The college has tracked Internet access since 1996. Currently, about 95% of credit students report that they have Internet access from home. Continuing education students are somewhat less likely to have computer and Internet access at home. According to the Spring 2011 continuing education student survey, 81% of continuing education students report that they have a computer at home and 78% report that they have Internet access at home.

**Figure 1-30. Credit Student Computer and Internet Access**

source: Spring Student Surveys

As the graph below shows, the percentage of credit students taking online and hybrid classes has increased substantially over the past six years.

**Figure 1-31. Credit Students Taking Online and Hybrid Classes**

source: Spring Student Surveys

### 1.02.04. Programs Designed to Increase Access & Success

Every three years, the annual Spring Student Survey asks students to rate their experiences with available services. The table shows recognition of services, use of services, and satisfaction with services, measured by the survey. Recognition is the percentage of students reporting they have heard of the service; use is the percentage of students reporting they have used the service; satisfaction is the percentage of service users who report the service was helpful or very helpful.

**Figure 1-32. Student Services Recognition, Use, and Satisfaction**

Service	Recognition			Use			Satisfaction		
	2004	2007	2010	2004	2007	2010	2004	2007	2010

### 1.02.05. Precollegiate Basic Skills Offerings & Outcomes

Precollegiate basic skills courses are defined by Title 5 of the California Code of Regulations as courses in reading, writing, computation, and English as a Second Language designated by the college as credit, non-degree applicable courses. In 2009-2010, the following courses were considered precollegiate basic skills courses: ENGL 182, 183, 186, 187, 188, 189, 190, and 191; ESL 111, 115, 116, 117, 118, 125, 127, and 128; MATH 141, 145, 146, 155, 190, 245, 246, and 255. In 2009-2010, elementary algebra courses were coded as basic skills courses for the first time due to changes in state definitions and degree applicable status. This resulted in a larger number of credit basic skills enrollments.

The table below shows enrollments, retention rates, and success rates for precollegiate basic skills courses.

**Figure 1-33. Precollegiate Credit Basic Skills Enrollment, Retention, and Success**

Measure	Fall 2008	Fall 2009	Fall 2010
Credit Basic Skills Census Enrollments	2,577	3,949	4,147
Credit Basic Skills Course Retention Rates	89%	85%	86%
Credit Basic Skills Course Success Rates	67%	62%	65%
Noncredit Basic Skills Enrollments	4,560	4,446	3,991

source: GCC MIS data submissions

### 1.02.06. Transition from Noncredit to Credit

The table below shows the percentage of students enrolled in noncredit courses during the Fall semester who concurrently enrolled in credit classes, and who enrolled in credit classes in the subsequent Spring semester.

For semesters before Fall 2007, these percentages are underestimates because only students registering in noncredit classes with their Social Security Numbers can be matched to credit enrollments. Additional students registering in noncredit classes without providing SSNs cannot be matched to credit enrollments and are not counted in the percentages reported below.

For Fall 2007 and later, the percentages are based on the new noncredit student ID number system and should be more accurate than earlier data. Beginning in Fall 2010, both credit and noncredit enrollment records are stored in the PeopleSoft student system, which should also increase accuracy.

**Figure 1-34. Number of Students Transitioning from Noncredit to Credit**

	Fall 2008	Fall 2009	Fall 2010
Total Noncredit Students	7,517	7,533	6,010
Concurrently Enrolled in Credit Classes	2%	2%	3%
Enrolled in Credit Classes in Next Spring Semester	4%	4%	6%

source: GCC MIS data submissions

## 1.03. Student Engagement

### 1.03.01. Community College Survey of Student Engagement (CCSSE)

Glendale Community College administered the nationally normed Community College Survey of Student Engagement (CCSSE) in Spring 2007, 2008, 2009, and 2010. A random selection of credit sections resulted in responses from approximately 1,200 students each year. The results of five "benchmarks" are reported below: Active and Collaborative Learning, Student Effort, Academic Challenge, Student-Faculty Interaction, and Support for Learners. The five benchmarks are based on 38 survey items. Each benchmark is standardized so the national average is 50. Results are reported for Glendale Community College and for the public community colleges in California administering the survey (13-16 colleges before 2011, and 24 colleges in 2011). GCC's average scores tended to be slightly higher than the statewide average.

**Figure 1-35. Active and Collaborative Learning**

The Active and Collaborative Learning benchmark assesses how often students participate in class, work with classmates in and out of class, and discuss course material outside of class.

**Figure 1-36. Student Effort**

The Student Effort benchmark includes items assessing how often students prepare for class, revise their coursework, and use tutoring and computer labs.

**Figure 1-37. Academic Challenge**

The Academic Challenge benchmark assesses how hard students must work in class, how much they must study, and how much colleges emphasize higher level thinking skills.

**Figure 1-38. Student-Faculty Interaction**

The Student-Faculty Interaction benchmark includes survey items assessing the frequency of student contact with instructors.

**Figure 1-39. Support for Learners**

The Support for Learners benchmark assesses students' perceptions of the college's commitment to academic and non-academic support for students.

source: Community College Survey of Student Engagement

## 1.04. Class Availability & Scheduling

### 1.04.01. Student Satisfaction with Course Scheduling

Satisfaction with scheduling and class availability have mirrored the state's budget difficulties and the subsequent class cuts. According to student surveys, approximately 20% of credit students have historically reported problems getting classes; the number increased to 42% in Spring 2003 and then decreased to 25% in Spring 2008. It then increased again, to 47% in Spring 2010 and even more dramatically to 76% in Spring 2011.

**Figure 1-40. Percentage of Credit Students Having Problems Getting Classes**

source: Spring Student Surveys

**Figure 1-41. Scheduling Problems Identified by Students**

Problem	Spring 2009	Spring 2010	Spring 2011
Class full	33%	39%	48%
Class not offered at time student wanted it	25%	24%	31%
Class scheduled at same time as another class student needed	8%	22%	27%
Class not offered this semester	18%	12%	13%

source: Spring Student Surveys

### 1.04.02. Classroom Occupation, Availability & Fill Rate

Classroom occupation can be presented as “scheduling density,” or the number of class sections scheduled to begin during each available time block of the day. The figure below shows overall scheduling density for the past three Fall semesters. For Fall 2009, the highest number of class sections was scheduled to begin between 6:00 pm and 6:59 pm (aggregating across days of the week). In the figure, the darkest shading indicates that at least 65% of the highest number of sections is scheduled to begin in that time block. No shading indicates that 20% or less of the highest number of sections is scheduled to begin in that time block. Classrooms are occupied most during time blocks with dark shading, and are occupied least during time blocks with no shading.

**Figure 1-42. Scheduling Density for Credit Classes by Time of Day**

Start Time	Fall 2007	Fall 2008	Fall 2009	Fall 2010
6:00 am – 6:59 am	6	9	8	13
7:00 am – 7:59 am	30	23	26	111
8:00 am – 8:59 am	267	254	263	38
9:00 am – 9:59 am	201	214	206	353
10:00 am – 10:59 am	181	172	170	198
11:00 am – 11:59 am	14	12	10	38
12:00 noon – 12:59 pm	138	136	137	67
1:00 pm – 1:59 pm	229	226	224	245
2:00 pm – 2:59 pm	59	51	49	56
3:00 pm – 3:59 pm	64	54	48	103
4:00 pm – 4:59 pm	53	57	61	49
5:00 pm – 5:59 pm	81	73	69	145
6:00 pm – 6:59 pm	349	330	312	341
7:00 pm – 7:59 pm	75	76	71	62
8:00 pm – 8:59 pm	13	10	3	39
9:00 pm – 9:59 pm	2	2	1	12

source: GCC Class Master data files, GCC PeopleSoft student system

Fill rate is the percentage of available seats filled at census date. The table below shows fill rate for the credit instructional divisions.

**Figure 1-43. Credit Division Fill Rate**

Division	Fall 2007	Fall 2008	Fall 2009	Fall 2010
Biology	108%	118%	118%	86%
Business	70%	82%	88%	110%

source: GCC PeopleSoft student system

### 1.04.03. Enrollment of GCC Students at Other Colleges

Community college students in urban areas frequently enroll at more than one community college. The table below shows the number of first-time college students enrolling in GCC credit courses in 2002-2003, 2003-2004, and 2004-2005 who subsequently enrolled at other two-year colleges. Note that the numbers for specific colleges is duplicated, so if a student enrolled at both Pasadena City College and LA Valley College after GCC, that student would be counted twice.

Approximately one quarter of GCC credit students subsequently enroll at another California community college within six years.

**Figure 1.44. GCC Students Subsequently Enrolling at Other Two-Year Colleges**

	GCC Entry Year					
	2003-2004		2004-2005		2005-2006

## 2.01. Student & Course Outcomes

### 2.01.01. Enrollment, Retention, and Success

For most classes, the college is funded by the number of enrollments active on census date. The table below shows census enrollments, retention rates, and success rates by division. Retention rate is defined as the percentage of census enrollments resulting in a grade other than W (withdrawal). Success rate is defined as the percentage of census enrollments resulting in a grade of A, B, C, or CR (credit). Note that W's are included as failures in the success rate calculation.

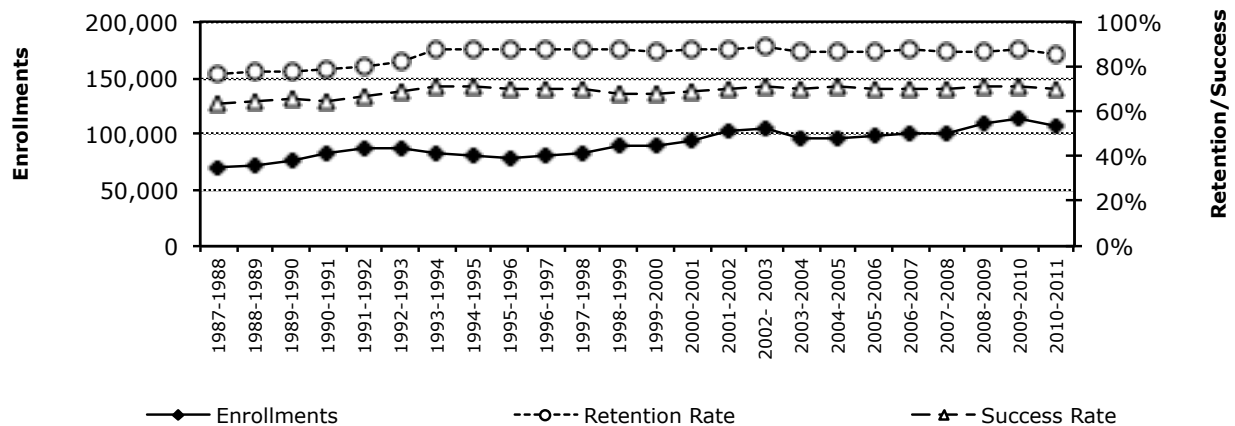

**Figure 2-1. Fall Credit Census Enrollments, Retention Rates, and Success Rates**

Division	Census Enrollments			Retention Rate			Success Rate		
	2008	2009	2010	2008	2009	2010	2008	2009	2010

The graph below shows historical census enrollments, retention rate, and success rate for all credit classes. Success and retention increased somewhat between 1991-1992 and 1992-1993, but have remained flat since 1993-1994.

**Figure 2-2. Enrollment, Retention, and Success by Academic Year**

source: GCC Grade Detail data file and PeopleSoft database

Noncredit classes are funded by the positive attendance accounting method, in which hours of attendance are recorded. One Full-Time Equivalent Student (FTES) is equivalent to 525 hours of attendance. In 2010-2011, the noncredit program counted over 1,400,000 hours of attendance. The decline from 2009 to 2010 is partially due to lower noncredit enrollments, but also due to difficulties in implementing attendance tracking with the college's move to the PeopleSoft student system.

**Figure 2-3. Fall Noncredit Attendance: Total Hours and Students Enrolled**

Department	Total Hours (Fall)			Students Enrolled (Fall)

The following page shows student outcome measures by ethnic, gender, age, disability, citizenship, and EOPS groups. These measures and groups are derived from GCC's Student Equity Plan and are reported in the Campus Profile every year. The following definitions apply to Figure 2-5:

- NUM The total number of students in the group
- MEAN UNITS ATT The average number of units students attempted in Fall 2010
- MEAN UNITS COMP The average number of units students completed in Fall 2010
- SPRG PERS The percentage of Fall 2007 students persisting to Spring 2011
- COMPL TERM GPA The Fall 2010 GPA of students who completed more than zero units
- COMPL PERS The percentage of Fall 2009 students completing more than zero units who persisted to Spring 2011
- COMPL NUM The total number of students in the group completing more than zero units

source: GCC MIS data files

The above table includes Potential Issues for Equity (PIE) markers: +, -, and √. A minus sign indicates that the measure for the specified group is less than 80% of the college average. A plus sign indicates that the measure is above the college average, and a check indicates the measure is between the college average and 80% of the college average.

### 2.01.02. Success of Students Receiving Additional Services

Students completing orientation and Student Educational Plans (SEPs) have higher success and persistence rates than students who do not complete these activities. However, it is important to note that differences between the student groups (goals, motivation, etc.) probably contribute to the greater success. The success difference cannot be attributed solely to the completion of orientation and an SEP.

**Figure 2-6. Success and Persistence of New Students Completing Orientation, SEP, and Assessment**

	Fall 2008	Fall 2009	Fall 2010
<b>Course Success Rate</b>			
<i>All new students</i>	65%	64%	78%
New students completing orientation	69%	74%	80%
New students completing SEP	67%	77%	86%
New students completing assessment	63%	64%	79%
<b>Persistence to Spring</b>			
<i>All new students</i>	72%	72%	81%
New students completing orientation	80%	82%	87%
New students completing SEP	92%	93%	92%
New students completing assessment	78%	78%	85%

source: Student Master Record, Grade Detail, and Matriculation data files, GCC MIS data submissions

### 2.01.03. Student Satisfaction

Every Spring semester, the college conducts a student survey which includes evaluations of student satisfaction. The following table shows results most relevant to the Key Performance Indicators of the college Strategic Master Plan.

**Figure 2-7. Student Satisfaction Survey Results**

<b>% of Credit Students Responding "Excellent" or "Good"</b>	Spring 2008	Spring 2009	Spring 2010	Spring 2011
The education you are getting at GCC	83%	--	--	--
Campus friendliness to students	71%	72%	73%	74%

source: Spring Student Surveys

## 2.02. Educational Goals

### 2.02.01. Student Characteristics by Educational Goal

Over half of all credit students (about 57%) indicate that their goal is to transfer (with or without an associate's degree). The percentage with a transfer goal decreased somewhat through the mid 1990s and early 2000s, but has recently increased. About 15% of credit students have a vocational goal; this represents a drop from about 20% in 1998. In the table below, percentages do not include students with unknown goals.

**Figure 2-8. Credit Enrollment by Educational Goal**

Goal	Fall 2008		Fall 2009		Fall 2010	
Transfer with AA	6,312	40%	6,782	41%	4,335	32%
Transfer without AA	2,575	16%	2,734	17%	3,283	25%
Associate's degree	1,888	12%	2,061	12%	1,026	8%
Vocational degree	295	2%	286	2%	640	5%

<b>Total</b>	<b>15,977</b>	<b>100%</b>	<b>16,566</b>	<b>100%</b>	<b>15,573</b>	<b>100%</b>

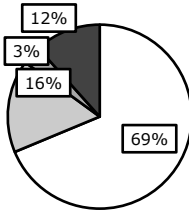

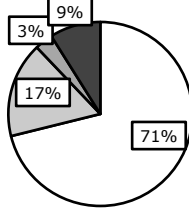

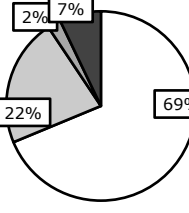

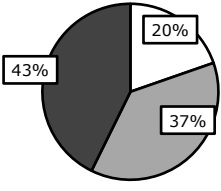

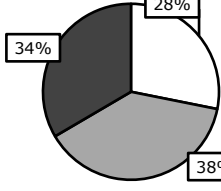

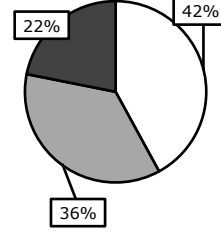

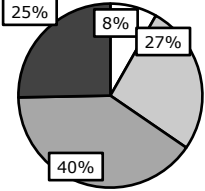

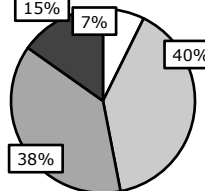

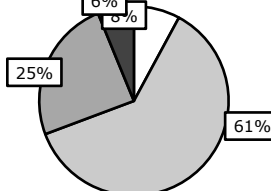

source: GCC Semester Application database

The following pages show characteristics of credit students by educational goal. Transfer-goal students are younger and take more units than other students, and educational development students are older and more likely to be U.S. citizens than other students.

source: GCC Graduation database

Time between entry and degree completion has decreased slightly in the past three years. The average time between entry and AA completion was 5.0 years for degrees completed in 2010-2011, representing a decrease from about 5.5 years in the mid 1990s. Time to certificates has also decreased since the late 1990s.

**Figure 2-15. Mean Entry to Degree Time (Years)**

source: GCC PeopleSoft database

The graphs below show success milestones for students entering GCC as first-time college students in Fall 2007. The percentage of entering students reaching each milestone within four years is shown. Transfer prepared students have completed at least 60 UC/CSU transferable units with a GPA of 2.0 or higher in those units. Transfer ready students are transfer prepared, have passed English 101, and have passed a transferable Math course. (Note that the two student groups overlap: students with a goal of transfer with an AA are included in both groups.)

**Figure 2-16. Percentage of Fall 2007 Entering Cohort Achieving Success Within 4 Years**

source: GCC MIS data files

### 2.03.02. Continuing and Community Education Student Completion

The GCC Continuing and Community Education programs offer adult high school diplomas and General Education Development (GED) testing. The following table shows the number of student completions in non-credit areas.

CASAS (Comprehensive Adult Student Assessment System) tests are used to assess student competencies in several areas, including ESL. CASAS tests are also used to document student progress for CalWORKs recipients.

**Figure 2-17. Continuing and Community Education Student Completion**

	2008-2009	2009-2010	2010-2011
Students obtaining GED	93	102	90
Students completing high school diploma	8	10	4
Successful student completions of high school courses			192
CASAS Benchmarks			
Students earning ESL CASAS benchmarks	2,968	2,933	2,603
Students earning Adult Basic Education CASAS benchmarks	133	145	98

source: GCC Continuing and Community Education Program

### 2.03.03. Transfer

A primary part of the college's mission is to prepare students for transfer to four-year institutions. The number of students transferring from GCC has fluctuated in the past 15 years, but has tended to increase since 1998. While the number of transfers to UC remained flat between 2008-2009 and 2009-2010, the number of transfers to CSU dropped substantially, due primarily to the CSU's restriction of Spring transfers in 2010.

**Figure 2-18. Transfers from GCC to UC and CSU**

source: California Postsecondary Education Commission (CPEC)

**Figure 2-19. Retrospective Transfer History**

Year	To UC	To CSU	To Independents*	To In-State Privates	To Out-of-State	Total Known

\* Before 2002-2003, CPEC reported Fall-only transfers to independent institutions. Transfers to UC, CSU, in-state privates, and out-of-state institutions are reported for students entering at any time during the academic year.

The table below shows the number of transfer students to UC and CSU institutions. Most of GCC's transfer students transfer to CSU Northridge and CSU Los Angeles.

**Figure 2-20. Number of Transfers to Senior Institutions**

Transfer Institution	2007-2008	2008-2009	2009-2010

The California State University makes information available about transfer student performance at the CSU. Transfer students from GCC generally attain approximately the same GPA at the CSU as the average community college transfer student. Data are shown for upper-division transfers to CSU.

**Figure 2-21. Performance of Upper-Division Students Transferring to CSU**

Performance Measure	Fall 2007	Fall 2008	Fall 2009	Fall 2010
Number of CSU Transfers from GCC	463	415	464	595
Pre-Admission GPA of Transfers from GCC	2.93	2.97	2.91	2.99
Fall-to-Fall Persistence of GCC Transfers	88%	88%	89%	
Persistence of All CC Transfers	85%	85%	86%	
CSU GPA of Persisters from GCC	2.94	2.98	2.96	
CSU GPA of Persisters from All CC's	2.94	2.99	2.98	

source: CSU Academic Performance Reports

Note: Performance data for Fall 2009 transfers to CSU were not available in time for publication of the Campus Profile.

Glendale Community College receives information from the National Student Clearinghouse about GCC students who enroll at four-year colleges and universities. In contrast with the retrospective data presented above, in which students enrolling at four-year institutions were tracked back to the two-year college they attended, data from the National Student Clearinghouse allow prospective studies, in which students at GCC can be categorized according to their future enrollments at four-year institutions. The different sources of data give different information about student transfer.

The following table tracks first-time students entering GCC between 2002-2003 and 2005-2006. Students in each cohort were tracked for six academic years to determine their enrollments at four-year colleges and universities. All enrollments after the student's first term at GCC are counted in the table.

**Figure 2-22. Prospective Analysis of GCC Students Enrolling at Four-Year Institutions**

	Year Entering GCC			
	2002-2003	2003-2004	2004-2005	2005-2006

UC Davis	10	9	7	13

source: National Student Clearinghouse data files

Transfer rates are reported by the California Community Colleges Chancellor’s Office using a standard definition. Students who complete 12 or more units and attempt transfer-level English or math within six years of entry at a California community college are tracked to see whether they enrolled at a four-year institution. Chancellor’s Office data matches with UC, CSU, and the National Student Clearinghouse, which provides enrollment data for member institutions across the United States, provide transfer information. The transfer rate is the number of students enrolling at a four-year institution within six years divided by the total number of students in the cohort.

**Figure 2-24. GCC Transfer Rate**

	Entering Cohort			
	2001-2002	2002-2003	2003-2004	2004-2005
Transfer Rate				
Glendale Community College	46.4%	48.6%	50.0%	50.7%
Region 7 Colleges	38.9%	39.3%	41.2%	41.2%
All California Colleges	39.9%	40.2%	40.7%	40.6%

**2.03.04. Accountability Reporting for the Community Colleges (ARCC)**

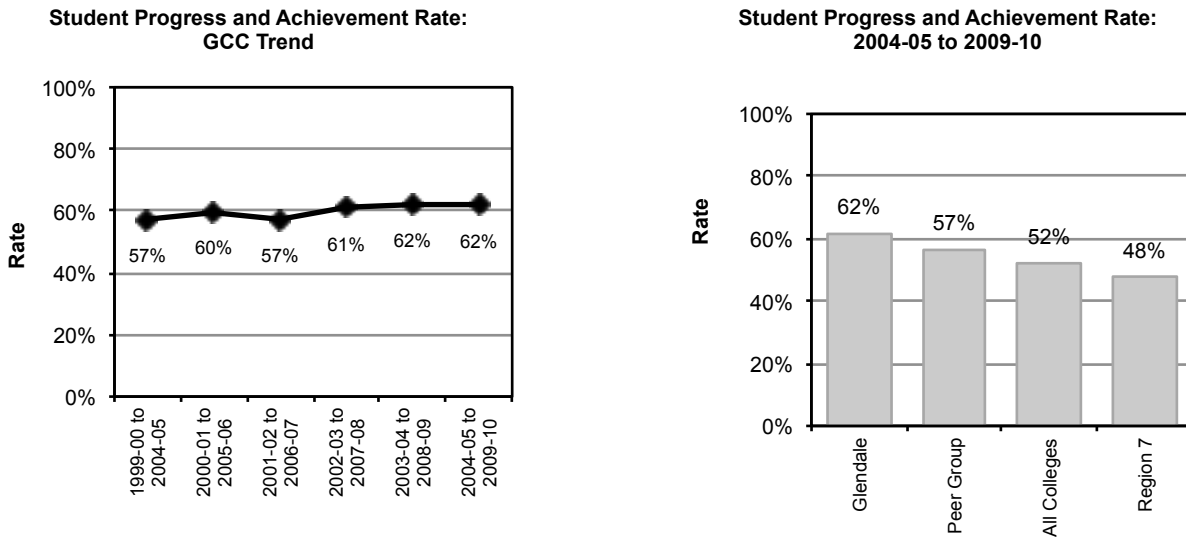

Accountability Reporting for the Community Colleges (ARCC) is an accountability reporting system created in response to Assembly Bill 1417 in 2004. The first report on the performance of community colleges in California was released in January 2007. The following figures summarize GCC’s performance on the most recently published ARCC indicators.

For each indicator, GCC’s performance is compared to the performance of four comparison groups: a state-defined peer group specific to that indicator, all community colleges in California, and all colleges in Region 7.

**Figure 2-25. ARCC Indicator A: Student Progress and Achievement Rate**

“Student Progress and Achievement Rate” is the percentage of first-time students who showed intent to complete and achieved any of the following outcomes within six years: transferred to a four-year institution, earned an AA/AS or certificate of at least 18 units, achieved “transfer directed” status, or achieved “transfer prepared” status.

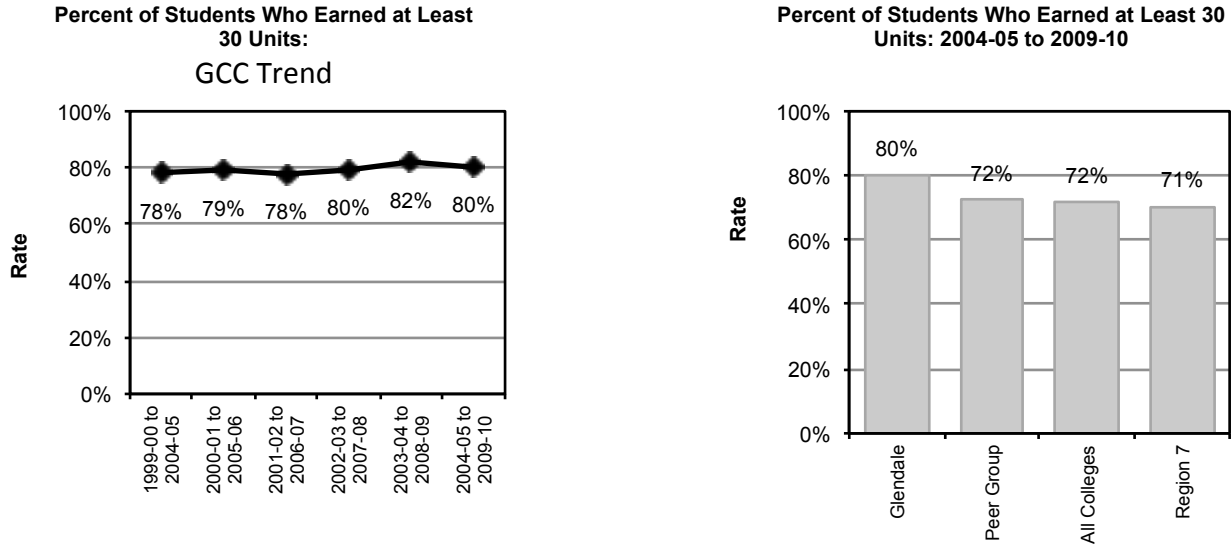

GCC ranks 7<sup>th</sup> out of the 23 colleges in the state-defined peer group for Indicator A, and 15<sup>th</sup> out of the 109 colleges in California for which data were reported. GCC ranks 1<sup>st</sup> out of the 14 colleges in Region 7.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

**Figure 2-26. ARCC Indicator B: Percent of Students Who Earned at Least 30 Units**

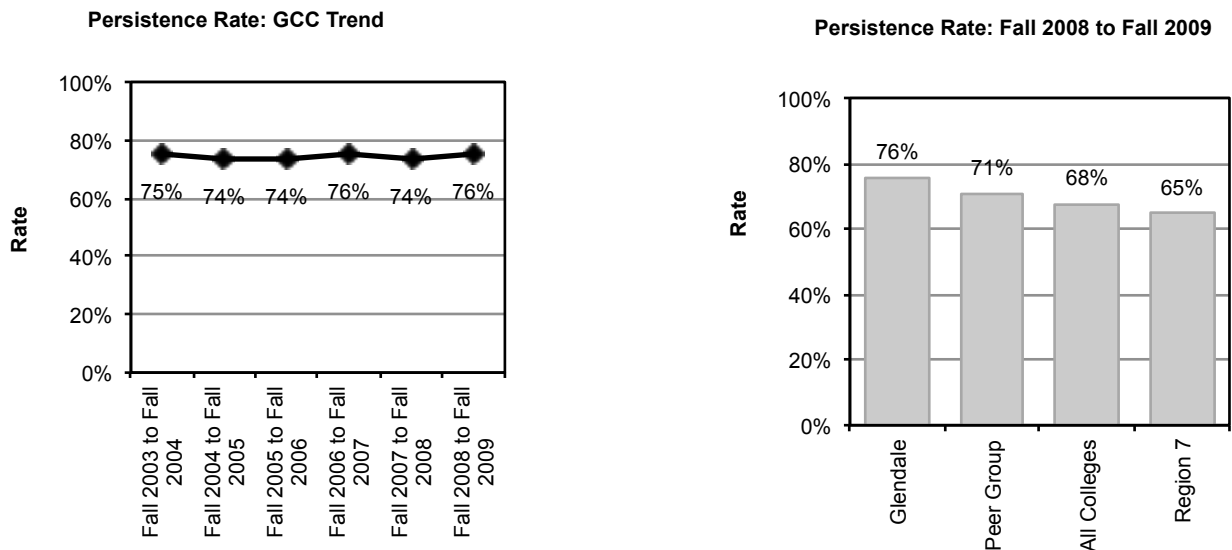

“Percent of Students Who Earned at Least 30 Units” is the percentage of first-time students who showed intent to complete and earned at least 30 units in the California community college system. GCC ranks 1<sup>st</sup> out of the 38 colleges in the state-defined peer group for Indicator A, and 4<sup>th</sup> out of the 109 colleges in California for which data were reported. GCC ranks 1<sup>st</sup> out of the 14 colleges in Region 7.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

**Figure 2-27. ARCC Indicator C: Persistence Rate**

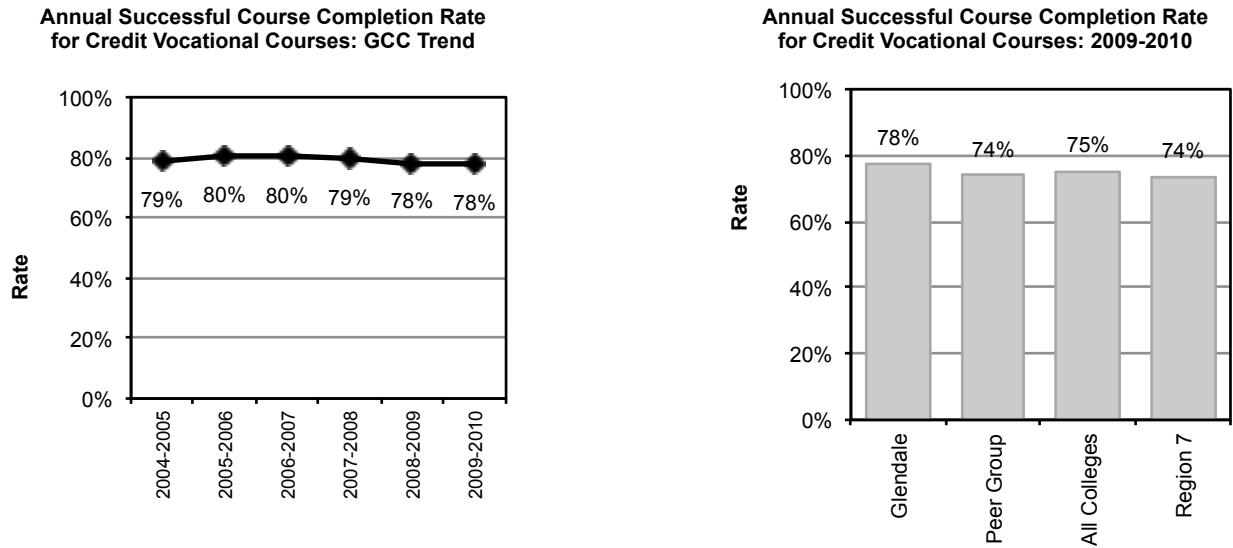

“Persistence Rate” is the percentage of first-time students with a minimum of six units earned in a Fall term who enrolled in the subsequent Fall term anywhere in the California community college system. GCC ranks 6<sup>th</sup> out of the 24 colleges in the state-defined peer group for Indicator A, and 21<sup>st</sup> out of the 111 colleges in California for which data were reported. GCC ranks 3<sup>rd</sup> out of the 14 colleges in Region 7.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

**Figure 2-28. ARCC Indicator D: Annual Successful Course Completion Rate for Credit Vocational Courses**

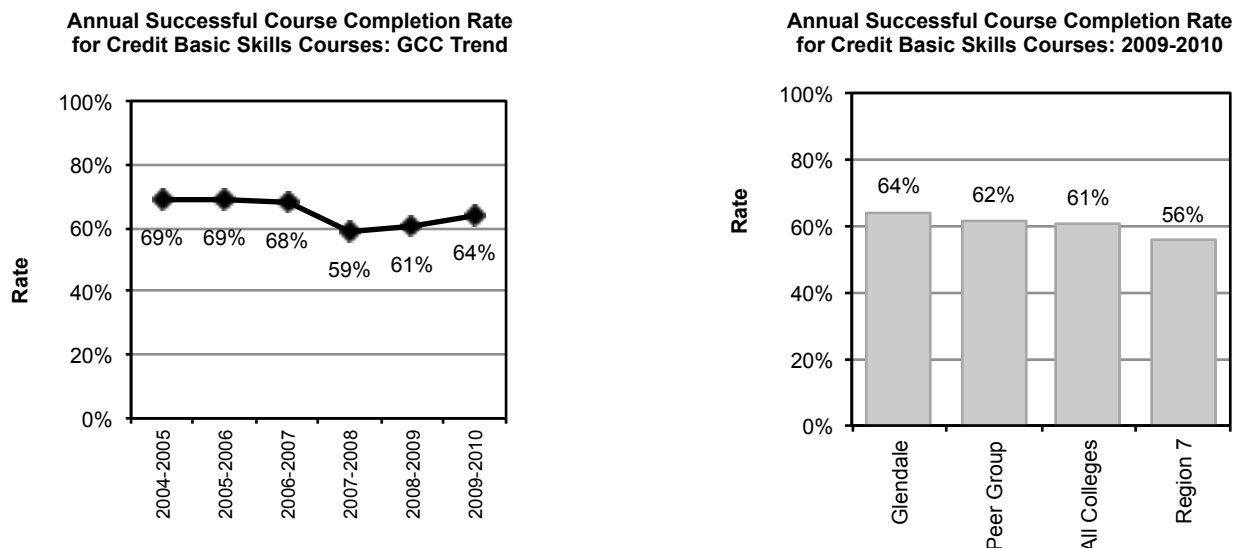

“Annual Successful Course Completion Rate for Credit Vocational Courses” is the percentage of credit vocational course enrollments that were passed with a grade of A, B, C, or CR. GCC ranks 7<sup>th</sup> out of the 41 colleges in the state-defined peer group for Indicator A, and 31<sup>st</sup> out of the 111 colleges in California for which data were reported. GCC ranks 2<sup>nd</sup> out of the 14 colleges in Region 7.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

**Figure 2-29. ARCC Indicator E: Annual Successful Course Completion Rate for Credit Basic Skills Courses**

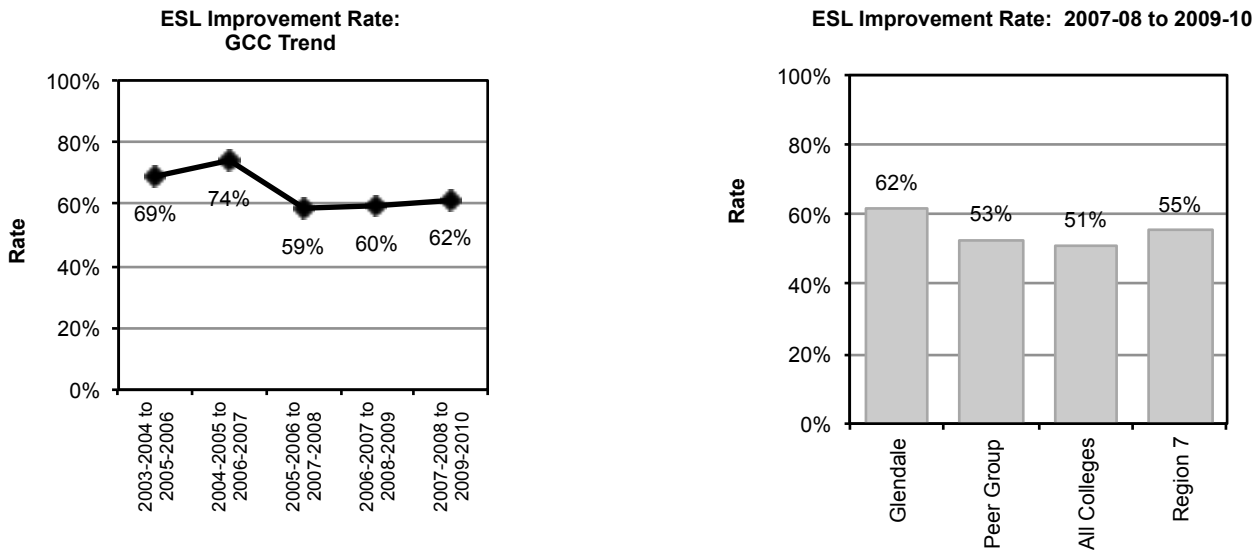

“Annual Successful Course Completion Rate for Credit Basic Skills Courses” is the percentage of credit basic skills course enrollments that were passed with a grade of A, B, C, or CR. GCC ranks 6<sup>th</sup> out of the 13 colleges in the state-defined peer group for Indicator A, and 34<sup>th</sup> out of the 111 colleges in California for which data were reported. GCC ranks 4<sup>th</sup> out of the 14 colleges in Region 7.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

**Figure 2-30. ARCC Indicator F: ESL Improvement Rate**

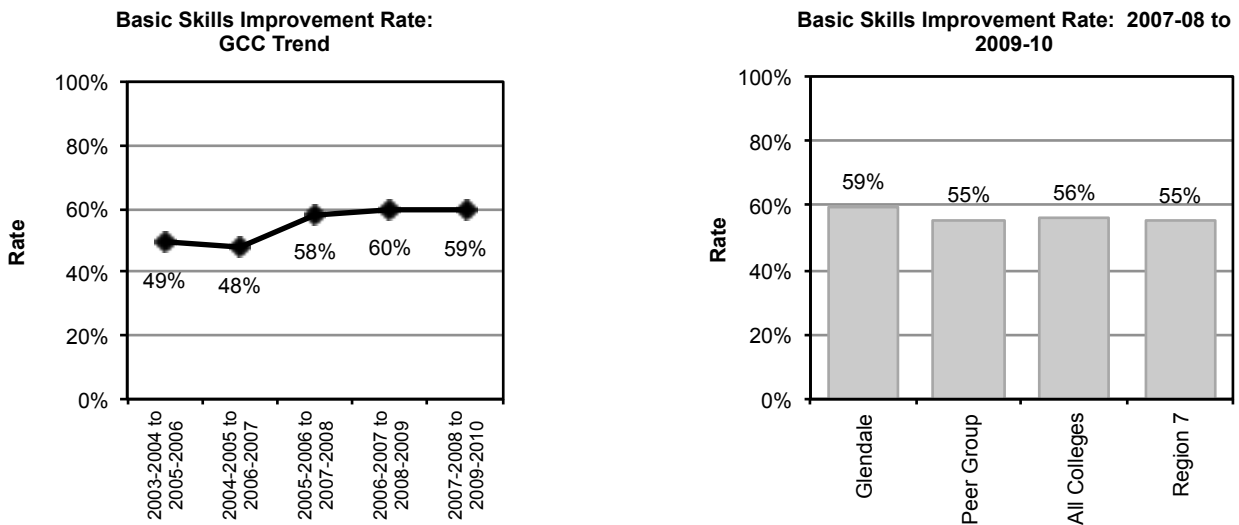

“ESL Improvement Rate” is the percentage of students successfully completing a credit ESL course who subsequently passed a higher-level ESL course or a college-level English course within three years. The initial course is two or more levels below a transfer-level course. In the 2010 ARCC report, GCC ranks 8<sup>th</sup> out of the 20 colleges in its state-defined peer group and 27<sup>th</sup> out of the 102 colleges in the state for which data were available. GCC ranks 8<sup>th</sup> among the 14 colleges in Region 7 on this measure.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

**Figure 2-31. ARCC Indicator G: Basic Skills Improvement Rate**

“Basic Skills Improvement Rate” is the percentage of students successfully completing a credit basic skills English or Math course who subsequently passed a higher-level course in the same discipline within three years. The initial course is two or more levels below a transfer-level course. In the 2010 ARCC report, GCC ranks 3<sup>rd</sup> among the 15 colleges in its state-defined peer group and 43<sup>rd</sup> among the 110 colleges for which data were available. GCC ranks 4<sup>th</sup> out of the 14 colleges in Region 7.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

**Figure 2-32. ARCC Indicator H: CDCP Student Progress and Achievement Rate**

The newest ARCC indicator is “CDCP Student Progress and Achievement Rate,” which measures progress for students taking noncredit courses. CDCP is an acronym for Career Development and College Preparation and refers to a subset of noncredit courses offered by California community colleges. The indicator measures the percentage of first-time students completing at least 8 hours of CDCP courses who either complete a degree-applicable credit course outside PE, earn a CDCP certificate, become transfer directed or transfer prepared, earn an associate degree, or transfer to a four-year institution. Because CDCP offerings vary among community colleges, data are available for only 37 colleges. GCC ranks 6<sup>th</sup> among the 37 colleges with available data. GCC ranks 4<sup>th</sup> out of the 9 colleges in Region 7.

source: Chancellor’s Office “Focus on Results” Report ARCC Reports

### 2.03.05. Time to Goal Completion (Student Right-to-Know Data)

The tables below show Student Right-to-Know data, made publicly available by the college and by the Chancellor's Office. Each year, the cohort of entering, full-time, degree-seeking students is identified and tracked for three years to determine the percentage of the cohort completing a goal. By definition, Student Right-to-Know "completers" are those students who have completed a degree or certificate, or who have become transfer prepared by completing at least 56 transferable units with a GPA of 2.0 in those units. (Note: The methodology used to define the cohort changed for the Fall 2000 cohort and again for the Fall 2004 cohort, resulting in a larger cohort and lower success rates.)

"Transfers Out" refers to students who transferred to a four-year institution or to a California community college. The percentage of transfers out is sometimes reported as a transfer rate. It is a flawed measure of transfer because it counts only non-completing students (ignoring those students the college has successfully prepared for transfer) and it includes "transfers" to other community colleges.

**Figure 2-33. Student Right-to-Know Data**

<b>Glendale Community College</b>			
Entering Cohort	Number in Cohort	Transfers Out	Completers
Entering Fall 2001	667	21%	41%
Entering Fall 2002	355	27%	37%
Entering Fall 2003	396	10%	43%
Entering Fall 2004	1,022	21%	31%
Entering Fall 2005	1,557	20%	29%
Entering Fall 2006		18%	31%
Entering Fall 2007		18%	29%

<b>Statewide (All California Community Colleges)</b>			
Entering Cohort	Number in Cohort	Transfers Out	Completers
Entering Fall 2001	37,116	17%	39%
Entering Fall 2002	30,444	30%	36%
Entering Fall 2003		17%	36%
Entering Fall 2004	86,982	25%	25%
Entering Fall 2005	128,018	18%	24%
Entering Fall 2006		17%	25%
Entering Fall 2007		15%	24%

### 2.03.06. Workforce Preparation

The state of California tracks students who complete community college vocational programs into the workforce. The table below shows workforce placement (employment in the first year after college). Placement rates are measured for "leavers & completers," those students who completed at least one occupational course and earned at least 12 units in a vocational program area, or who earned a vocational degree or certificate, and who are not still enrolled at a community college.

Beginning in 2008, each community college in California must negotiated a performance level for it to meet. The performance level and the differences between the negotiated level and GCC's rates are shown in the table. All data are aggregated across all vocational programs at GCC.

**Figure 2-34. Workforce Placement and Retention of GCC Vocational Students**

	Reporting Year		
	2008-2009	2009-2010	2010-2011
	Data Year

### 3.01.02. Workload

The standard measure of faculty workload is defined as Weekly Student Contact Hours (WSCH) divided by Full-Time Equivalent Faculty (FTEF). The following table shows WSCH per FTEF by credit division for Fall and Spring semesters only.

**Figure 3-4. Faculty Workload by Division**

Division	2008-2009			2009-2010			2010-2011		
	WSCH	FTEF	WSCH Per FTEF	WSCH	FTEF	WSCH Per FTEF	WSCH	FTEF	WSCH Per FTEF

Source: CCFS 320, Class Master data files, GCC PeopleSoft student system

#### Notes

1. WSCH data for the WSCH per FTEF calculation includes enrollments in classes with weekly, daily, and positive attendance accounting methods, not just weekly classes.
2. Due to some inflexibility in the coding of FTEF for certain lab classes, the FTEF reported in the Biology and Physical Sciences divisions are not accurate.
3. Health Sciences division FTEF data do not include clinical sessions taught by adjunct instructors. This exclusion underestimates FTEF and overestimates WSCH per FTEF.
4. Student Services division FTEF data are coded differently from FTEF data for other divisions, so the Student Services division is not included in the table.

## 4.01. Revenues

### 4.01.01. Revenue Sources

The tables below show GCC’s revenue sources. About 75% of GCC’s general fund revenues come from state sources, compared to about 20% from local sources and 3% from federal sources. The increase in state revenues from 2003-2004 onward is due in part to an accounting shift of \$200 million from deferred apportionment.

**Figure 4-1. General Fund Revenues, Glendale Community College**

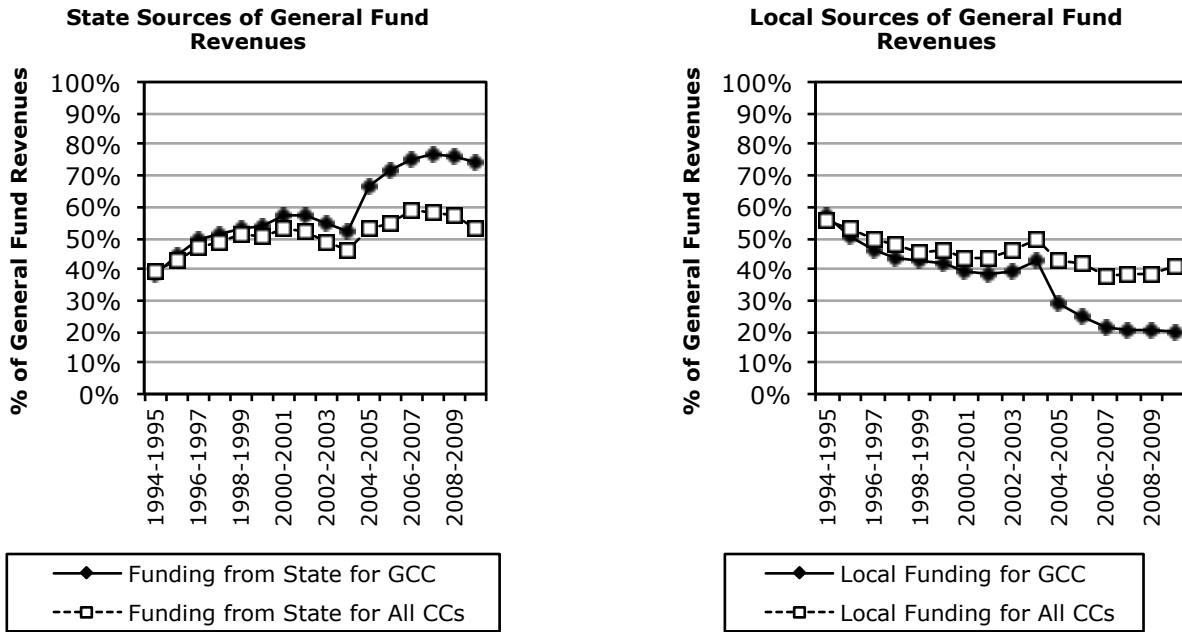

Year	State	Local	Federal	Total
1993-1994	\$18,613,602	\$21,520,265	\$1,957,797	\$42,091,664

source: Chancellor's Office Fiscal Data Abstracts

Note: The change from 2003-2004 to 2004-2005 in state revenue is high due in part to an "accounting shift of \$200 million from 2003-04 to 2004-05. Chapter 227 (AB 1754), Statutes of 2003, deferred the appropriation of \$200 million until 2004-2005 (\$50 million for Partnership for Excellence and \$150 million for general apportionment)," according to the Chancellor's Office Fiscal Data Abstract for 2004-2005.

#### 4.02.02. Expenditure Comparison to Statewide Averages

The following table shows categories of general fund expenditures. In general, GCC spends a slightly greater percentage of the general fund on salaries and a slightly smaller percentage on benefits, supplies, and materials than the statewide average. In 2007-2008, GCC spent 46% of general fund expenditures on administrative and support functions. The statewide average was 48%.

**Figure 4-7. General Fund Expenditures as Percentage of Total Expenditures**

The table below shows "current expense of education," reflecting unrestricted general fund expenditures for academic salaries, classified salaries, employee benefits, supplies and materials, and other expenses, services, and equipment replacement for instructional, administrative, and support activities. It is required that at least 50% of the current expense of education be expended for salaries of classroom instructors.

### 4.03. Funded and Unfunded FTES

#### 4.03.01. Funded and Unfunded FTES

The college frequently serves more students than the state funds. The following graph shows the number of Full-Time Equivalent Students (FTES) generated by resident students and the number reported to the state for funding. The difference is "overcap," unfunded, resident FTES.

**Figure 4-9. Funded and Unfunded Resident FTES History**
