

DSL 022 Arithmetic IB

- use measures of central tendency (range, mean, mode, median) to create and interpret visual representation of data;
- use measurements involving U.S. customary and metric length, weight, temperature, and liquid, and calculate conversions within and between the two systems;
- understand basic geometric vocabulary and shapes; calculate circumference, perimeter, and area;
- simplify numeric and algebraic expressions;
- solve equations with one variable and apply to real world problems.
