

**Glendale Community College Instructional Division
Program Learning Outcomes Assessment Timeline**

Please complete a separate timeline form for *each* program within your division

Division name:

Technology and Aviation

Program name (degree, certificate, sequence of courses or series of learning activities leading to intellectual mastery):

Engineering Support Technology

Program Relationship to Glendale Community College's Core Competencies/Institutional Student Learning Outcomes (ISLOs)

How does this program relate to GCC's College's Core Competencies/Institutional Student Learning Outcomes (ISLOs)?:

Core Competencies/ISLOs are commonly defined as the knowledge, skills, abilities, and attitudes that students are expected to develop as a result of their overall experiences with any aspect of the college, including courses, programs, and student services. Each program offered at GCC should link to at least some of these Core Competencies/ISLOs. A list of the Core Competencies/ISLOs can be found here:

<http://www.glendale.edu/Modules/ShowDocument.aspx?documentid=4362>

Include a brief statement outlining how this program aligns with GCC's Core Competencies/ISLOs

An ideal relationship:

- Is clear and brief
- Is connected to GCC's Core Competencies/ISLOs
- If applicable, aligns with professional organization(s) learning outcomes

This program aligns itself with a number of core competencies. The Engineering Support Technology program enhances the students abilities in Communication (1a,1b,1c, 1e) through reading and writing of design and project descriptions and the evaluation of a design project. Mathematical Competencies (2a, 2b) through the measuring and evaluation of an engineering design project. Information Competencies (3a, 3b, 3c, 3d) through researching and evaluating information related to an engineering design project. Critical Thinking (5b, 5c, 5e) through the critique of the students own work and the evaluation of case studies. Personal Management (6a, 6b) by the creation of work designed to aid achieving employment and/or college transfer. Application of Knowledge (7a, 7b, 7c, 7d) by learning the various computer software and the workplace skills required to complete a design project.

Program Level Outcomes (PLOs) Assessment Timeline

<p>What are the Program Learning Outcomes of this program?: Program Learning Outcomes (PLOs) are commonly defined as the knowledge, skills, and abilities that students have attained as a result of their involvement in a particular set of educational experiences such as within a specific program, degree, certificate or series of learning activities leading to intellectual mastery List your PLOs below and explain the timeline by which the PLOs will be assessed</p> <p>What is the PLO Assessment Planning Timeline for this Program?: To develop an ongoing and systematic planning timeline, it is recommended that you assess PLOs within a 3 year cycle (e.g. assess 1/3 of PLOs in year 1, 1/3 in year 2, and 1/3 in year 3)</p>			<p>Ideal examples of Program Learning Outcomes:</p> <ul style="list-style-type: none"> • Are observable and measurable • Are program specific • Connect to GCC's Core Competencies/ISLOs • Use action verbs • Generally a program will have between three and six PLOs • If applicable, aligns with professional organization(s) learning outcomes <p>Ideal examples of Program Assessment Timelines:</p> <ul style="list-style-type: none"> • Are practical, sustainable, and geared to Core Competencies/ISLOs, and college mission • Ensure that each PLO is assessed regularly within a 3 year cycle • Include teams for assessment data collection and analysis and assessment report writing that include faculty members who are instructors of the courses/programs assessed 		
<p>List PLOs below. Generally, a program will have between three and six PLOs. Continue to add PLOs until you have developed an assessment timeline for each PLO associated with this program.</p>	<p>In what semester and year will you assess this PLO? What data will you use to assess it (i.e. SLO data from courses within the program, exam or essay data, portfolios of student work, licensing/exit exams, etc) ?</p>	<p>Who will collect and analyze the PLO assessment data and write a report of the findings? (Include report writer's name and, if possible, other participants)</p>			
<p>PLO 1 Students will demonstrate skills in the production of working drawings of electro-mechanical and design projects.</p>	<p>This PLO will be assessed beginning the Spring 2012 Semester. SLO data from within each course will be used for the assessment.</p>	<p>Tom Ferguson</p>			
<p>PLO 2 Students will develop and discuss engineering</p>	<p>This PLO will be assessed beginning the Spring 2012 Semester. SLO data from within</p>	<p>Tom Ferguson</p>			

design techniques, principles, and manufacturing.	each course will be used for the assessment.	
PLO 3 Students will demonstrate techniques to accomplish drawings utilizing different computer aided design (CAD) software.	This PLO will be assessed beginning the Spring 2012 Semester. SLO data from within each course will be used for the assessment.	Tom Ferguson

Course/Program Alignment Matrix

<p>How are courses in the program aligned with the program's learning outcomes?: This section should include a matrix of the PLOs for your program and a list of each course which is a part of the program</p> <ul style="list-style-type: none"> • For each course indicate if PLO is addressed within it the level at which it is addressed by either leaving it blank (if not addressed in program) or noting I, D, or M • Introduce = I PLO is introduced at a basic level • D = Develop Students are given opportunities to practice, learn more about, and receive feedback to develop more sophistication • M = Mastery Students demonstrate mastery at a level appropriate for graduation 	<p>Ideal alignment:</p> <ul style="list-style-type: none"> • Course/Program matrix indicates that PLOs are embedded in program's coursework • PLOs are introduced, developed, and mastered within the range of courses • Each course addresses one or more of the PLOs; however, rarely does a course address all PLOs
--	--

	PLO 1 Students will demonstrate skills in the production of working drawings of electro-mechanical and design projects.	PLO 2 Students will develop and discuss engineering design techniques, principles, and manufacturing.	PLO 3 Students will demonstrate techniques to accomplish drawings utilizing different computer aided design (CAD) software.
Engr 100 – Intro to Engineering	I	I	
Engr 101 - Drafting and Basic Design	D	D	
Engr 104 – Advanced Engineering Drawing	M	M	M
Engr 106 – Electronic Drawing	D	D	D
Engr 108 – Electro-Mechanical Packaging	M	M	M
Engr 109 – Basic AutoCAD	D	D	D

Applications			
Tech Ed 140 – Technical Writing (English 120 or ESL 151 optional)	D	D	D
Tech Ed 143 – Technical Mathematics (Math 101 optional)	D	D	D

As you fill out this alignment matrix, gaps may occur or become visible. Use the gaps to help your determine which course or program SLOs may need to be revised so that all courses and programs are aligned. Question 2.2 in your program’s Program Review report provides a means to explain if you noted any gaps in alignment and, if yes, how your division might revise course or program SLOs to ensure that all course and program learning outcomes are aligned.

Engineering/Electro-Mechanical Design Certificate PLO

Students will demonstrate skills and knowledge required in the field of electro-mechanical design including: the engineering field, drafting and design, electronic drawing, electro-mechanical packaging, and basic computer aided design (CAD) software.
