# Pharmacy Technician

## Helping You Change Your Career - and Your Future

When you're looking to make a change in your life, and for a school to help you get there, look no further. We're committed to helping you identify a career where you can succeed by providing the training to get you ready. We offer a unique environment designed to help students excel — with hands-on learning, small work teams and instructors who make learning interesting. You get to practice in a real-world setting, so you get everything you need to start — and flourish — in your new career.

### Making Learning Interesting

- Specializing in Hands-On Learning
- Flexible Class Schedules
- Instructors with Real-World Experience
- A Close Community of Students and Instructors

### Program Information

A career in pharmacy gives you the chance to be a part of one of the fastest growing fields in healthcare. The dynamic pharmacy environment requires that professionals understand clinical, administrative and reimbursement issues that the pharmacy organization faces on a daily basis. Pharmacy technicians work in pharmacies under the direction of a pharmacist. Their main responsibility is filling prescriptions according to doctors' orders for patients. State laws decide the activities that pharmacy technicians can perform. This comprehensive training program will prepare students to enter the pharmacy field and to take the optional Pharmacy Technician Certification Board's (PTCB) exam.

### Program at a Glance

Our program provides instruction in the following essential areas:

- Screening prescription orders for accuracy and completeness
- Preparing prescriptions- retrieve, count, pour, weigh, measure, and sometimes mix the medication
- Performing calculations
- Using technology to help maintain accurate patient records, prepare & package medications and place orders
- Understanding the effect of medications on the body
- Identifying the use, dosages and purposes of medications

*\* For complete program details, please call 888-766-1770 for a Student Advisor.*

### What Are the Career Opportunities?

Graduates of this program may find career opportunities in the following areas:

- Retail Pharmacies
- Hospital Pharmacies
- Drug Companies
- Education

### What's the Career Demand?

The pharmacy technician profession is projected to be among the fastest growing occupations between 2010 and 2020, with an estimated 32 percent increase in employment.

As a result of advances in pharmaceutical research, more prescription medications are being used to fight diseases. Also, the number of older people is growing, and older people use more prescription drugs than younger people. Job prospects should be excellent for pharmacy technicians, particularly those with formal training and those with experience in retail settings.

- Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, 2012-13 Edition, Pharmacy Technician.
