<p>BIOL125H ANATOMY/PHYSIOLOGY SLO0000521 recognize and/or summarize the defining anatomical and/or physiological characteristics among the major phyla of marine organisms</p> <p>Last Assessed 8/1/2012</p>	<p>PLO_ID PLO001324 PLO Title BAJA ACADEMIC PLO Description Perform better in field-based courses compared to the same course on campus</p> <p>Last Assessed 6/1/2012 3 - Met Expectations</p>	<p>ILO 1 Communication ILO039 communicate clearly, demonstrate critical thinking, and apply knowledge utilizing writing, speaking, presenting and other modes of communication</p>	<p>ILO 3 Information Competency (literacy) ILO41 recognize an information need, or define a research topic using library and other resources to locate, evaluate, and use information or data in an ethical and legal manner</p>
<p>BIOL125H ECOLOGY SLO0000534 identify and/or explain the ecological characteristics of the major marine ecosystems and the impact that humans have had</p> <p>Last Assessed 6/1/2012 2 - Developing We are disappointed to discover that 63.4% of the students earned a non-passing score of less than 4 points on this important test question, including 15 students who earned no points. Some of these students provided answers which did not address the question. Many had diagrams with missing or incorrect labels on their axes (because half of the credit was for the diagrams, these students would have failed to obtain a passing grade even if their essay was complete and correct). Other students mixed</p>		<p>ILO 4 Critical Thinking ILO42 analyze problems and apply knowledge; collect, synthesize, and evaluate ideas, information and data to develop arguments and derive conclusions</p>	
<p>BIOL125H PHYSICAL/CHEMICAL SLO0000547 recognize and/or explain aspects of the major geological, physical and/or chemical oceanographic processes</p> <p>Last Assessed 6/15/2014 3 - Met Expectations These results are fairly good as more than 50% of the students achieved a passing grade of C or better. However, we would like to see more than 50% of our students achieving a grade of B or A. One of the main difficulties appeared to be the essay question, which requires a comprehensive understanding of several concepts, as well as the ability to draw and interpret graphs, and to write clearly and effectively. Some students may benefit from a handout with a detailed written description of</p>		<p>ILO 5 Global Awareness and Appreciation ILO43 recognize and analyze the interconnectedness of global, national, and local concerns, analyzing cultural, political, social and environmental issues from multiple perspectives, and to appreciate similarities and differences among cultures</p>	
<p>BIOL126 BIODIVERSITY SLO0000573 list the basic steps in the method to describe new species, recognize examples of local marine biodiversity, and/or identify the interactions between the abiotic and biotic factors in a major marine ecosystem</p>		<p>ILO 6 Personal Responsibility ILO44 demonstrate and apply decision making skills and develop the capacity for self-understanding and recognize lifestyles that promote physical and mental well-being</p>
