

SCIENCE
LECTURE
SERIES

While in the garden with the Teacher, the student asked, "Could you explain human nature to me?" The Teacher pointed to a worm he had just cut in two while digging. "That is a human being - two separate natures, trying to re-unite."

PARADOXES

The lecture will look at different types and examples of paradoxes concluding with the greatest paradox of all – human nature.

PETER STATHIS

Emeritus Professor of Mathematics
