

WE RISE

# There's a shorter path to a **BSN.**

Together, we can help students  
do more in nursing.

To earn a Bachelor of Science in Nursing (BSN), community college students would normally have to transfer to a four-year university. Not anymore. With the help of our Concurrent Enrollment Program (CEP), students completing their Associate Degree in Nursing (ADN) can simultaneously work toward a BSN —earning both in only three years.

We're also offering a Tuition Guarantee Program for Community College students that locks in tuition at \$350 per credit hour.

# The Concurrent Enrollment Program (CEP)

## How It works

When students enroll in the CEP, they'll take all of their classes with the same 15–25 students from their Associate Degree in Nursing (ADN) program. This built-in support helps students focus as they complete their degree, one class at a time.

## The benefits

Your students will save time and money by:

- Completing a BSN in less than a year after their ADN
- Following a schedule that works around their ADN classes
- Transferring their credits seamlessly through our Transfer Pathway
- Taking fewer courses than in a traditional RN to BSN track

For your community college, the CEP has the potential to improve retention and increase ADN graduation rates – all while preparing your students for advanced nursing roles.

They can access a powerful support system.

In addition to the familiar names they'll see in every class, students will also be assigned a Team of Advisors that can assist them with questions about enrollment, academics and finances. They can also take advantage of our full suite of University resources for both associate and bachelor's degree courses.

Our BSN program features:

- Accreditation by the Commission on Collegiate Nursing Education (CCNE)
- Instructors who average 20 years of real-world experience
- Curriculum aligned with third-party industry standards, including:
  - American Association of Colleges of Nursing (AACN)
  - Quality and Safety Education for Nurses (QSEN)
  - American Nurses Association (ANA)

## About University of Phoenix

University of Phoenix was founded in 1976 to make higher education accessible to working adults. Our students benefit from the convenience of evening classes, flexible scheduling, frequent start dates, a student-centered environment, online classes, mobile-friendly classrooms, a digital library and computer simulations. Our promise to our students is to provide an innovative education designed around practicality and relevant skills that are sought after in today's workplaces.
