

# Additional Coursework by Major

A strong application for admission will show solid progress toward the intended degree. The curricula of many undergraduate majors require lower-division, introductory coursework often available at other institutions. Students wishing to be more competitive in the applicant pool should consider completing the suggested courses listed for their major. For majors in business, architecture and dental hygiene, completion of these courses is required for admission. Science and engineering majors can become stronger candidates for admission by completing the additional coursework listed.

The course numbers listed below are USC course numbers. Please visit [arr.usc.edu/transfercrredit](http://arr.usc.edu/transfercrredit) to find an equivalent course at the college you attend.

Majors that require a third-level foreign language are indicated with a checkmark in the “Foreign Lang.” column.
