Visualization Area

Architectural Visualization Skill Award

The Architectural Visualization Skill Award is to train the student in the fields of Perspective Drawing and Descriptive Geometry. This will enhance the students' skill in visualizing an architectural structure. Introductory training in the SketchUp and Rhinoceros software is also included. Upon completion of this skill award, the student will be able to create drawings needed for the preliminary design of an architectural project.

<u>Course</u>	<u>Units</u>
Arch 101 – Basic Drafting and Design	3
Arch 103 – Descriptive Geometry.....	3
Arch 105 – Perspective Graphics w/Introduction to SketchUp and Rhinoceros	3
Total Units.....	9

Note:

Arch 103 and 105 requires the completion of the prerequisite class, Arch 101.
(The student may enroll in both classes at the same time with instructor permission.)

Please Note:

If the student feels that they meet the equivalent education/experience, please contact the instructor or department chair for permission to enroll in classes that require a prerequisite.

Last Revision: Tuesday, April 3, 2018
