

RECOMMENDED BIOLOGY HEALTH SCIENCE COURSE SEQUENCE

Although Biology 115 and Biology 114 are not a prerequisite for Biology 120, it is strongly recommended that students without a science background in biology take Biology 115 or Biology 114 prior to Biology 120. Students who have taken Biology 115 or Biology 114 are better prepared for the rigor of Anatomy and Physiology. Students are advised **NOT** to take Biology 112 concurrently with Biology 120 or Biology 121.

Students are recommended to take the chemistry requirement before or concurrently with Biology 120.
