

Guided Pathways: Planning, Implementation, Evaluation

Creating guided pathways requires managing and sustaining large-scale transformational change. The work begins with thorough planning, continues through consistent implementation, and depends on ongoing evaluation. Colleges should assess their readiness for intensive, broad-based change before beginning this work.

PLANNING

IMPLEMENTATION

ESSENTIAL CONDITIONS

Make sure the following conditions are in place – prepared, mobilized, and adequately resourced – to support the college's pathways effort:

- Strong leadership throughout the institution
- Faculty, staff, and student engagement
- Commitment to using data
- Capacity to use data

- Technology infrastructure
- Professional development
- Favorable policy (state, system, and institutional levels)

PLANNING/PREPARATION

Understand where you are and prepare for change by:

- Engaging stakeholders and making the case for change
- Establishing a baseline for key performance indicators
- Developing flowcharts of how students choose, enter, and complete programs
- Developing an implementation plan with roles and deadlines

EARLY

OUTCOMESMeasure key performance

- indicators, including:Number of college credits earned in first term
- Number of college credits earned in first year
- Completion of gateway math and English courses in the student's first year
- Persistence from term 1 to term 2
 - Rates of college-level course completion in students' first academic year

CLARIFY THE PATHS

Map all programs to transfer and career and include these features:

- Detailed information on target career and transfer outcomes
- Course sequences, critical courses, embedded credentials, and progress milestones
- Math and other core coursework aligned to each program of study

HELP STUDENTS GET ON A PATH

Require these supports to make sure students get the best start:

- First-year experiences to help students explore the field and choose a major
- Full program plans based on required career/transfer exploration
- Contextualized, integrated academic support to help students pass program gateway courses
- K-12 partnerships focused on career/college program exploration

HELP STUDENTS STAY ON THEIR PATH

Keep students on track with these supports:

- Ongoing, intrusive advising
- Systems for students to easily track their progress
 - Systems/procedures to identify students at risk and provide needed supports
 - A structure to redirect students who are not progressing in a program to a more viable path

ENSURE STUDENTS ARE LEARNING

Use these practices to assess and enrich student learning:

- Program-specific learning outcomes
 - Project-based, collaborative learning
 - Applied learning experiences
 - Faculty-led improvement of teaching practices
 - Systems/procedures for the college and students to track mastery of learning outcomes

SUSTAINABILITY

Commit to pathways for the long term and make sure they are implemented for all students by:

- Determining barriers to sustainability (state, system, and institutional levels)
- Redefining the roles of faculty, staff, and administrators as needed
- Identifying needs for professional development and technical assistance
- Revamping technology to support the redesigned student experience
- Reallocating resources as needed
- Continuing to engage key stakeholders, especially students
- Integrating pathways into hiring and evaluation practices

Revisit conditions, sustainability, and implementation. Continuously improve pathways by building on elements that work and adjusting or discarding elements that are not serving all students well.

EVALUATION

The Pathways Project is led by the American Association of Community Colleges in partnership with Achieving the Dream (ATD), The Aspen Institute, Center for Community College Student Engagement (CCCSE), Community College Research Center (CCRC), Jobs for the Future (JFF), The National Center for Inquiry and Improvement (NCII), and Public Agenda. It is funded with support from the Bill & Melinda Gates Foundation.
