Director of Facilities Resigns

It is with regret that I announce the resignation of Nelson Oliveira as Director of Facilities. Nelson has led and supported significant projects and accomplishments in the Glendale Community College facilities area during his six years of service to the college as Director. Among those achievements are completion of numerous Measure G bond projects including the Sierra Vista Building, a state award winning energy conservation and cost savings program, major infrastructure improvements, the design and preparation for construction of the new athletics facility, and planning underway for key Measure GC projects including a new welding facility, new science building and new dance, music, and instruction building.

I know you join me in thanking Nelson for his service and wishing him well in his new professional opportunities.

David Viar
