### **CATALOG DESCRIPTION**

LIB 100 introduces students the effective use of library and non-library information resources and services in a variety of academic disciplines and professions. Students learn the core concepts of information retrieval and the essential techniques of organizing, presenting, evaluating, and analyzing information as well as how to properly attribute sources used. Topics include: information cycle and timeline; comparing, contrasting, and selecting library and open web resources; types and characteristics of information sources; effective information research planning; search techniques, evaluation criteria, and ethical use of information. This class enhances critical thinking and evaluation skills by using a variety of textual, graphical, visual, and audio (re)sources to assess how information is produced, consumed, and presented and teaches students how to assess sources for perspective, veracity, and authority in order to develop the ability to apply critical thinking practices to specific disciplinary contexts and information problems within the student's field of interest.

### **CATALOG NOTES**

Students completing LIB 100, LIB 191, LIB 190 will receive a maximum of three units of credit. This class is eligible for Pass/No-Pass Option.
