SPRING 2023

ESL 146
Reading and Vocabulary for Statistics

This course is designed for students who plan to major in business, science or social science or who simply have interest in reading and understanding statistics, especially those who are taking or plan to take Math 136/136+.

In Math 136, ESL students are working with not only mathematics vocabulary, formulas and calculations, but also complex word problems with advanced English grammar and vocabulary related to American culture. In this ESL 146 class, students will work with other students to improve their skills in the following areas:

» **textbook reading**
» **note-taking**
» **statistics and math vocabulary**
» **strategies for reading and solving word problems**
» **reading graphs and charts**

Students must purchase a copy of 5th edition of Michael Sullivan's textbook, *Statistics: Informed Decisions Using Data*.

**TICKET #1319
MONDAY/WEDNESDAY
12:20–1:45 PM
REMOTE**

Professor: Paul Vera
16-week class
Starting February 21

If you are interested, please contact Paul Vera at pvera@glendale.edu.
