

Film Analysis Assignment

I. Pick a section (no longer than 2 minutes) of one scene that you think you will use in your essay. Create a description of each shot in your scene by filling out the "Film Screenplay" chart below.

Note: A “shot” consists of a group of frames that are produced from the time the record button on a camera is turned on to the time it is turned off and filming ends. Every time the camera changes angles in a film scene, we have a new shot.

Shot #	Description of Shot and Interesting Observations	Dialogue and Soundtrack	Camera Movement or Transition effects
