Materials making up *Campus Profile 2010* were collected, tabulated, analyzed, and formatted by the Research & Planning Unit staff with the assistance of various campus units, especially Information Technology Systems.

PREFACE

The *Campus Profile* is designed to help faculty, staff, and students understand the college's diverse operations and make informed decisions. The publication is organized around the statewide accountability model. It is the intent of Research & Planning to incorporate accountability reports mandated by the federal and state governments into this annual publication, as such requirements develop.

The Campus Profile has had a recent change in organization. Before 2008, the first section profiled the community and local school districts. Because more information about the community has become available in recent years, this section has now been separated into a new report, the Community Profile, also published by Research & Planning. The Campus Profile is now focused on internal data about Glendale Community College while the Community Profile focuses on community and service area information.

Other recently added features of the Campus Profile include a summary of statewide ARCC (Accountability Reporting for the Community Colleges) indicators on pages 46-50, a discussion of CCSSE (Community College Survey of Student Engagement) results on pages 21-22, and a section on incoming credit students on pages 14-15.

This publication tends to focus on relatively short time periods, typically three years, in reporting information. In some cases, longer time periods are reported when deemed especially useful. We have made additions and deletions to the information presented each year and will continue to do so as we receive your feedback.

The *Campus Profile* is also intended to be a tool for evaluation and planning. The symbol below indicates that a measure is related to one of the performance indicators from either the current Strategic Master Plan or earlier versions of the plan:

Ç

Additional information, including data from previous years, is available on the Research & Planning web site, located at http://research.glendale.edu. The web site includes most of the data available in the *Campus Profile* with extended historical data, and also includes additional features, including an enrollment history and reports available from Research & Planning.

1.01. Enrollment & Demographics

1.01.01. Credit & Noncredit Enrollment Trends

Mirroring California's budget difficulties, both credit and noncredit enrollment decreased from 2001-2002 to 2005-2006. Historically, annual enrollment has followed cycles of growth and decline. The last two peaks were in 1991-1992 and 2002-2003.

California community colleges receive apportionment funding from the state based on reported Full-Time Equivalent Students (FTES) served. Funding is received only for students who are residents of the state. The table below shows FTES claimed by the college for the past three years.

Figure 1-3. Full-Time Equivalent Students (FTES), Academic Years

1.01.02. Credit Student Demographics

Credit student demographics have remained relatively stable for the past five years. Female students outnumber males by 60% to 40%, and over half of all credit students are under age 25.

Figure 1-5. Enrollment Status of Credit Students

Category	Fall 2	.007	Fall 2	800	Fall 2	009

source: GCC SMR database

Mirroring a general trend in higher education, GCC serves more female students than male students. The ratio has been 60% female to 40% female since the mid 1990s. In the late 1990s, the ratio was approximately 50% to 50% for younger students, but older students were more likely to be female. Since 2000, females have outnumbered males in all age groups.

Figure 1-6. Gender of Credit Students

source: GCC SMR database

The graph below shows the age distribution of credit students. Although the average age of students is 27 years, the college serves relatively few students who are 27 years old. Because the distribution is skewed, the median age (23 years) is a more accurate estimate of the student population's age. Over one-third of all credit students are under age 21.

Figure 1-8. Age Distribution of Credit Students by Gender, Fall 2009

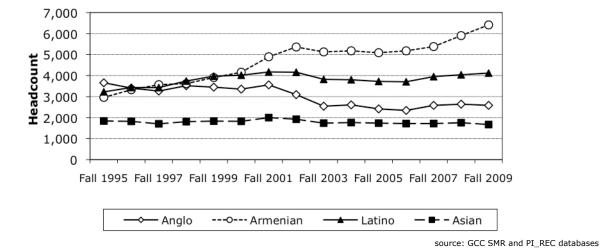

source: GCC SMR and PI_REC databases

The ethnic distribution of credit students changed dramatically with the waves of immigrants to Glendale in the 1980s, but ethnicity has been relatively stable since the mid 1990s. The percentage of credit students of Armenian origin has increased from 29% to 36% in the past five years; the percentage of credit students who are Caucasian students of European origin ("Anglos") has decreased somewhat in the same time period.

Figure 1-9. Ethnicity of Credit Students

Ethnicity	Fall 2	2007	Fall 2	2008	Fall 2	2009
Caucasian/European/Anglo	2,583	16%	2,640	15%	2,583	14%

source: GCC SMR database

According to student surveys, about 60% of credit students worked in 2010, representing a decline from about 70% in 2008. About 13% work at least 40 paid hours per week, and about 27% work between 20 and 39 paid hours per week. About 3% of credit students (450 per semester) are full-time students and work at least 40 hours per week.

Figure 1-11. Employed Hours of Credit Students, Spring 2010

source: Spring Student Survey

Less than half of all credit students reside in the Glendale Community College District. About 41% reside in the Los Angeles Community College District, 5% reside in other community college districts in California (including the Pasadena, Ventura, Santa Clarita, and Santa Monica districts), and 2% are international students. AB 540 students are nonresident immigrants who have graduated from a California high school and whose nonresident tuition is waived.

Figure 1-12. District Status of Credit Students

Most credit students (about 67%) are United States citizens. About 15% are permanent residents. The percentage of permanent residents increased from the mid 1980s through about 1996, then began to decrease.

Figure 1-13. Citizenship/Visa Status of Credit Students

A majority of credit students (about 70%) are part-time students, attempting fewer than 12 units in a semester. The average student attempts about 8 units in a semester and completes about 6 units. Fall 2009 and 2010 saw increases in the percentage of students attempting 6 to 11.9 units.

Figure 1-15. Unit Load of Credit Students

Some information about credit students is collected by the annual Spring Student Survey. The following graph shows student language (the percentage of credit students who learned English as their first language) and origin (the percentage of credit students born in the United States). About 50% of credit students where born in the United States and nearly 40% learned English as their first language.

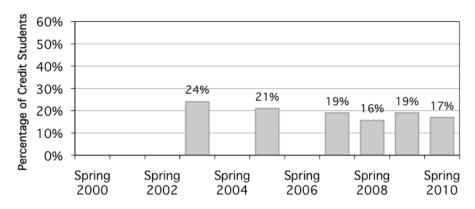

Figure 1-16. Credit Student Language and Origin

source: Spring Student Surveys

The next graph shows the percentage of credit students with dependent children, according to annual student surveys. In 2010, 17% of credit students had dependent children.

Figure 1-17. Credit Students with Dependent Children

source: Spring Student Surveys

The graph below shows the percentage of credit students reporting that they are first-generation college students. The annual survey asks about the education status of students' parents. A student is counted as a first-generation college student if neither parent attended college. Note that in other contexts, first-generation sometimes refers to a student if neither of his or her parents graduated college. It is important to note that colleges inside the United States are not separated from colleges outside the United States in this survey question, so first-generation status is not an estimate of the percentage of students unfamiliar with higher education in the U.S. Additionally, students are able to select an "I don't know" option if they are unaware of their parents' education status. Students selecting "I don't know" are not included in the percentage calculation; the percentage is based on credit students who know about their parents' education level.

Using this definition of first-generation status, approximately 35% of GCC credit students in 2010 were first-generation college students.

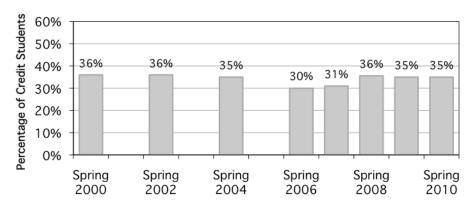

Figure 1-18. First-Generation Credit Students

Before 1982, community college students were not allowed to attend a college outside their district of residence without special permission. After the passage of Prop. 13, the state allowed students to attend any community college district. As a result, about 53% of Glendale College students reside outside the Glendale Community College District. The graph below shows the history of freshmen entering GCC from the college's three major feeder districts.

1.01.03. Noncredit Student Demographics

In 2007-2008, the enrollment system for continuing education (noncredit) courses changed. A standard online application was required for the first time in 2007-2008 and a noncredit student ID was assigned to each student. This improved the college's ability to track noncredit students. It also reduced the number of students of "unknown" gender, age, and ethnicity starting in Fall 2007.

The gender difference in the noncredit student population is more extreme than that in the credit student population. Female students in the noncredit program outnumber male students by a ratio of about 70% to 30%.

Figure 1-21. Gender of Noncredit Students

Gender	Fall 2	Fall 2007		Fall 2008		2009
Male	2,329	31%	2,415	32%	2,593	32%
Female	5,248	69%	5,223	68%	5,410	68%
Unknown	4	0%	1	0%	0	0%
Total	7,581	100%	7,639	100%	8,103	100%

source: GCC Noncredit Registration database

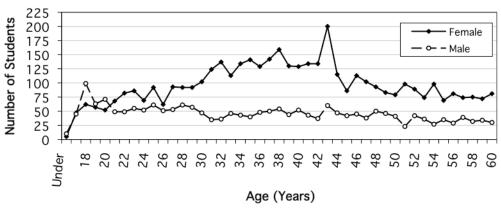

Noncredit students tend to be older than credit students. The median age of noncredit students was 43 years in Fall 2010, compared to 23 years for credit students. The mean age of noncredit students has decreased from 48 years in 1995 to 45 years in 2010.

Figure 1-22. Age of Noncredit Students

Figure 1-23. Age Distribution of Noncredit Students by Gender, Fall 2009

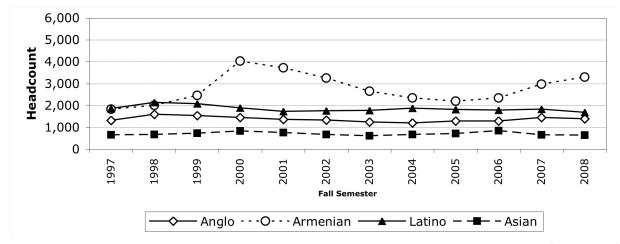

source: GCC Noncredit Registration database

The ethnicity of the noncredit population parallels that of the credit population. Armenian students make up over 40% of noncredit students, and Caucasian students of European descent ("Anglos") make up about 18%. In 2009, the method of collecting and reporting student ethnicity changed to include multiple ethnicities. The following table shows estimated percentages of students in each ethnic category for comparison to previous years.

Figure 1-24. Ethnicity of Noncredit Students

Ethnicity	Fall 2	2007	Fall 2008		Fall 2	2009
American Indian	6	0%	7	0%		0%
Asian/Pacific Islander	661	9%	643	8%		8%

1.02. Student Needs

1.02.01. Incoming Credit Students

GCC enrolls over 4,000 incoming credit students every Fall semester. Approximately 30% are new to GCC but have taken courses at other colleges. Another 35% of incoming students graduated high school during the same year as their entry into GCC.

Figure 1-27. Incoming Credit Students

The graph below shows the percentage of incoming credit students entering directly from high school who placed at the transfer level and the associate degree level for English/ESL and Math. Only about 12% of incoming students from high school place directly into both transfer-level English and Math, but about 36% place directly into both associate degree-level English and Math.

1.02.03. Financial Aid

Annually, about 40% of credit students receive some form of financial aid. The most frequently used category of financial aid is the Board of Governors (BOG) waiver, which waives enrollment fees and is available to California residents demonstrating financial need. About 40% of students receive BOG waivers every year.

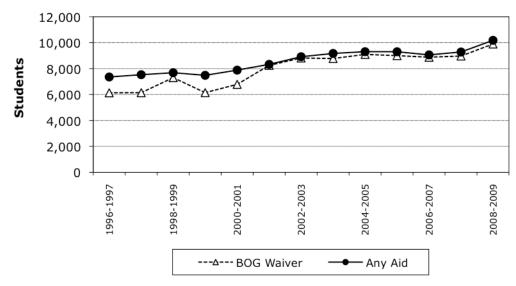

Figure 1-32. Financial Aid Awards

	200	6-2007	2007-2008		200	8-2009
Award Category	Students	Amount	Students	Amount	Students	Amount

1.02.04. Student Access to Technology

The college has tracked Internet access since 1996. About 94% of credit students report that they have Internet access from home.

Continuing education students are somewhat less likely to have computer and Internet access at home. According to the Spring 2010 continuing education student survey, 86% of continuing education students report that they have a computer at home and 82% report that they have Internet access at home.

Figure 1-34. Credit Student Computer and Internet Access

source: Spring Student Surveys

1.02.05. Programs Designed to Increase Access & Success

Glendale College offers many services to students. Every three years, the annual Spring Student Survey asks students to rate their experiences with the available services. The table on the next page shows recognition of services, use of services, and satisfaction with services, measured by the survey. Recognition is the percentage of students reporting they have heard of the service; use is the percentage of students reporting they have used the service; satisfaction is the percentage of service users who report the service was helpful or very helpful.

Figure 1-35. Student Services Recognition, Use, and Satisfaction

1.02.06. Precollegiate Basic Skills Offerings & Outcomes

Precollegiate basic skills courses are defined by Title 5 of the California Code of Regulations as courses in reading, writing, computation, and English as a Second Language designated by the college as credit, non-degree applicable courses. In 2009-2010, the following courses were considered precollegiate basic skills courses: ENGL 182, 183, 186, 187, 188, 189, 190, and 191; ESL 111, 115, 116, 117, 118, 125, 127, and 128; MATH 141, 145, 146, 155, 190, 245, 246, and 255. In 2009-2010, elementary algebra courses were coded as basic skills courses for the first time due to changes in state definitions and degree applicable status. This resulted in a larger number of credit basic skills enrollments.

The table below shows enrollments, retention rates, and success rates for precollegiate basic skills courses.

Figure 1-36. Precollegiate Credit Basic Skills Enrollment, Retention, and Success

Measure	Fall 2007	Fall 2008	Fall 2009
Credit Basic Skills Census Enrollments	2,480	2,577	3,949
Credit Basic Skills Course Retention Rates	89%	89%	85%
Credit Basic Skills Course Success Rates	63%	67%	62%
Noncredit Basic Skills Enrollments	not avail.	4,560	4,446

source: GCC MIS data files

1.02.07. Transition from Noncredit to Credit

The table below shows the percentage of students enrolled in noncredit courses during the Fall semester who concurrently enrolled in credit classes, and who enrolled in credit classes in the subsequent Spring semester.

For semesters before Fall 2007, these percentages are underestimates because only students registering in noncredit classes with their Social Security Numbers can be matched to credit enrollments. Additional students registering in noncredit classes without providing SSNs cannot be matched to credit enrollments and are not counted in the percentages reported below.

For Fall 2007 and later, the percentages are based on the new noncredit student ID number system and should be more accurate than earlier data.

Figure 1-37. Number of Students Transitioning from Noncredit to Credit

	Fall 2007	Fall 2008	Fall 2009
Total Noncredit Students	7,581	8,605	7,533
Concurrently Enrolled in Credit Classes	3%	3%	2%
Enrolled in Credit Classes in Next Spring Semester	5%	3%	4%

source: GCC Noncredit Registration and Student Master Record data files

1.03. Student Engagement

1.03.01. Community College Survey of Student Engagement (CCSSE)

Glendale Community College administered the nationally normed Community College Survey of Student Engagement (CCSSE) in Spring 2007, 2008, 2009, and 2010. A random selection of credit sections resulted in responses from approximately 1,200 students each year. The results of five "benchmarks" are reported below: Active and Collaborative Learning, Student Effort, Academic Challenge, Student-Faculty Interaction, and Support for Learners. The five benchmarks are based on 38 survey items. Each benchmark is standardized so the national average is 50. Results are reported for Glendale Community College and for the public community colleges in California administering the survey (16 in 2007, 19 in 2008, 15 in 2009, and 13 in 2010). GCC's average scores tended to be slightly higher than the statewide average.

Figure 1-38. Active and Collaborative Learning

The Active and Collaborative Learning benchmark assesses how often students participate in class, work with classmates in and out of class, and discuss course material outside of class.

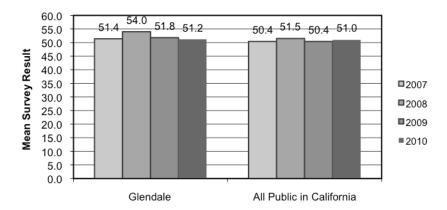

Figure 1-39. Student Effort

The Student Effort benchmark includes items assessing how often students prepare for class, revise their coursework, and use tutoring and computer labs.

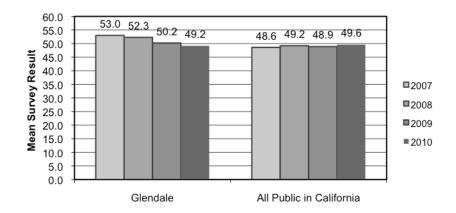

Figure 1-40. Academic Challenge

The Academic Challenge benchmark assesses how hard students must work in class, how much they must study, and how much colleges emphasize higher level thinking skills.

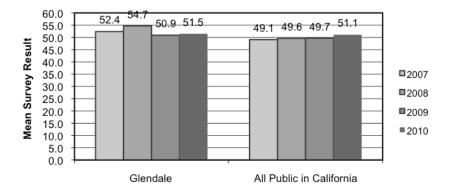

Figure 1-41. Student-Faculty Interaction

The Student-Faculty Interaction benchmark includes survey items assessing the frequency of student contact with instructors.

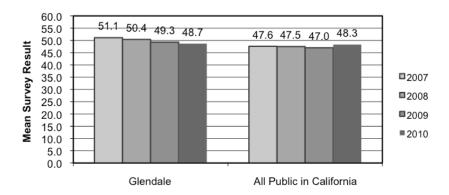

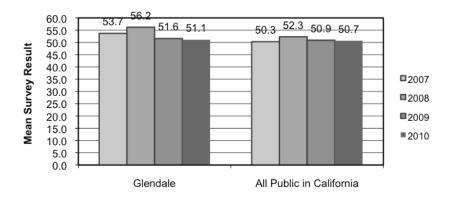

Figure 1-42. Support for Learners

The Support for Learners benchmark assesses students' perceptions of the college's commitment to academic and non-academic support for students.

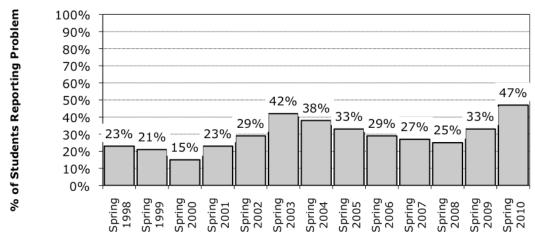

1.04. Class Availability & Scheduling

1.04.01. Student Satisfaction with Course Scheduling

Satisfaction with scheduling and class availability have mirrored the state's budget difficulties and the subsequent class cuts. According to student surveys, approximately 20% of credit students have historically reported problems getting classes; the number increased to 42% in Spring 2003 and then decreased to 25% in Spring 2008. It then increased again, to 47% in Spring 2010. The most commonly reported problem was that a class the student needed was full.

Figure 1-43. Percentage of Credit Students Having Problems Getting Classes

source: Spring Student Surveys

Figure 1-44. Scheduling Problems Identified by Students

	Spring	Spring	Spring
Problem	2008	2009	2010
Class full	16%	33%	39%
Class not offered at time student wanted it	9%	25%	24%
Class scheduled at same time as another class student needed	13%	8%	22%
Class not offered this semester	5%	18%	12%

source: Spring Student Surveys

1.04.02. Classroom Occupation, Availability & Fill Rate

Classroom occupation can be presented as "scheduling density," or the number of class sections scheduled to begin during each available time block of the day. The figure below shows overall scheduling density for the past three Fall semesters. For Fall 2009, the highest number of class sections was scheduled to begin between 6:00 pm and 6:59 pm (aggregating across days of the week). In the figure, the darkest shading indicates that at least 65% of the highest number of sections is scheduled to begin in that time block. No shading indicates that 20% or less of the highest number of sections is scheduled to begin in that time block. Classrooms are occupied most during time blocks with dark shading, and are occupied least during time blocks with no shading.

Figure 1-45. Scheduling Density for Credit Classes by Time of Day

Start Time	Fall 2006	Fall 2007	Fall 2008	Fall 2009
6:00 am - 6:59 am	5	6	9	8
7:00 am - 7:59 am	35	30	23	26

1.04.03. Enrollment of GCC Students at Other Colleges

Community college students in urban areas frequently enroll at more than one community college. The table below shows the number of first-time college students enrolling in GCC credit courses in 2002-2003, 2003-2004, and 2004-2005 who subsequently enrolled at other two-year colleges. Note that the numbers for specific colleges is duplicated, so if a student enrolled at both Pasadena City College and LA Valley College after GCC, that student would be counted twice.

Approximately one quarter of GCC credit students subsequently enroll at another California community college within four years.

2.01. Student & Course Outcomes

2.01.01. Enrollment, Retention, and Success

For most classes, the college is funded by the number of enrollments active on census date. The table below shows census enrollments, retention rates, and success rates by division. Retention rate is defined as the percentage of census enrollments resulting in a grade other than W (withdrawal). Success rate is defined as the percentage of census enrollments resulting in a grade of A, B, C, or CR (credit). Note that W's are included as failures in the success rate calculation.

The graph below shows historical census enrollments, retention rate, and success rate for all credit classes. Success and retention increased somewhat between 1991-1992 and 1992-1993, but have remained flat since 1993-1994.

Figure 2-2. Enrollment, Retention, and Success by Academic Year

source: GCC Grade Detail data file

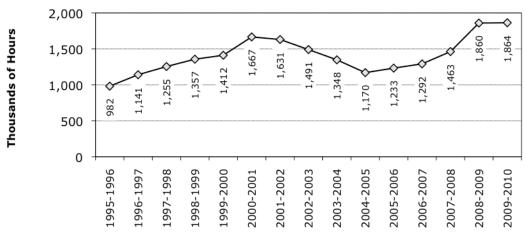

Noncredit classes are funded by the positive attendance accounting method, in which hours of attendance are recorded. One Full-Time Equivalent Student (FTES) is equivalent to 525 hours of attendance. In 2007-2008, the noncredit program counted over 1,400,000 hours of attendance.

Figure 2-3. Fall Noncredit Attendance: Total Hours and Students Enrolled

The above table includes Potential Issues for Equity (PIE) markers: +, -, and $\sqrt{.}$ A minus sign indicates that the measure for the specified group is less than 80% of the college average. A plus sign indicates that the measure is above the college average, and a check indicates the measure is between the college average and 80% of the college average.

2.01.02. Success of Students Receiving Additional Services

Students completing orientation and Student Educational Plans (SEPs) have higher success and persistence rates than students who do not complete these activities. However, it is important to note that differences between the student groups (goals, motivation, etc.) probably contribute to the greater success. The success difference cannot be attributed solely to the completion of orientation and an SEP.

Figure 2-6. Success and Persistence of New Students Completing Orientation, SEP, and Assessment

	Fall 2007	Fall 2008	Fall 2009
Course Success Rate			
All new students	62%	65%	64%

source: Student Master Record, Grade Detail, and Matriculation data files

The college offers many nontraditional learning opportunities. The table below shows the course success and persistence rates of students completing service learning hours through the college Service Learning Center. It also shows course success and persistence rates of students enrolled in classes offering Supplemental Instruction (SI).

Figure 2-7. Success and Persistence of Students Participating in Nontraditional Learning Opportunities

Students completing Service Learning	72%
Students enrolled in classes with SI	81%

source: Service Learning Center, SI Office, Grade Detail and Student Master Record data files

2.01.03. Student Satisfaction

Every Spring semester, the college conducts a student survey which includes evaluations of student satisfaction. The following table shows results most relevant to the Key Performance Indicators of the college Strategic Master Plan.

Ţ

Figure 2-8. Student Satisfaction Survey Results

2.02. Educational Goals

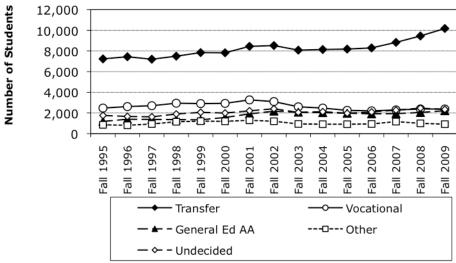

2.02.01. Student Characteristics by Educational Goal

Over half of all credit students (about 56%) indicate that their goal is to transfer (with or without an associate's degree). The percentage with a transfer goal decreased somewhat through the mid 1990s and early 2000s, but has recently increased.

About 13% of credit students have a vocational goal; this represents a drop from about 20% in 1998. The number of students whose goal is an associate's degree (without transfer) has increased somewhat, from 9% in 1995 to 12% in 2009.

Figure 2-9. Credit Enrollment by Educational Goal

source: GCC Semester Application database

The following pages show characteristics of credit students by educational goal. Transfer-goal students are younger and take more units than other students, and educational development students are older and more likely to be U.S. citizens than other students.

Figure 2-10. Characteristics of Credit Students by Goal, Fall 2009

source: GCC Semester Application, Grade Detail, and Student Master Record databases

source: GCC Semester Application, Grade Detail, and Student Master Record databases

The tables below show student ethnicity by credit educational goal. Students whose goal is transfer tend to mirror the ethnic diversity of the credit student population. Vocational students and educational development students are somewhat more likely to be Anglo than the overall credit population.

Figure 2-11. Ethnicity of Transfer Goal Students

2.03. Student Completion

2.03.01. Degrees & Certificates Awarded

Degree and certificate awards have increased from a low point in 1996-1997. Although the number of AS degrees awarded was relatively flat before 2006-2007, both AA degrees and certificates have increased substantially since the mid 1990s.

Figure 2-14. Number of Degrees and Certificates Awarded by Academic Year

source: GCC Graduation database

Time between entry and degree completion has decreased slightly in the past three years. The average time between entry and AA completion was 4.8 years for degrees completed in 2008-2009, representing a decrease from about 5.5 years in the mid 1990s. Time to certificates has also decreased since the late 1990s, but time to certificate completion has recently increased.

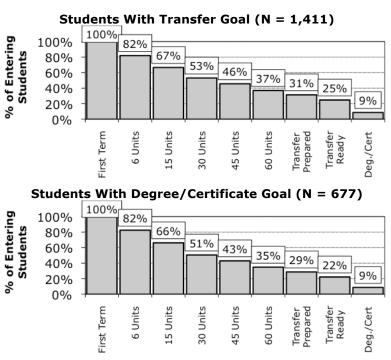

Figure 2-19. Mean Entry to Degree Time (Years)

source: GCC Graduation database

The graphs below show success milestones for students entering GCC as first-time college students in Fall 2006. The percentage of entering students reaching each milestone within four years is shown. Transfer prepared students have completed at least 60 UC/CSU transferable units with a GPA of 2.0 or higher in those units. Transfer ready students are transfer prepared, have passed English 101, and have passed a transferable Math course. (Note that the two student groups overlap: students with a goal of transfer with an AA are included in both groups.)

Figure 2-20. Percentage of Fall 2006 Entering Cohort Achieving Success Within 4 Years

source: GCC Grade Detail, Dictionary, and Graduation data files

2.03.02. Continuing and Community Education Student Completion

The GCC Continuing and Community Education programs offer adult high school diplomas and General Education Development (GED) testing. The following table shows the number of student completions in non-credit areas.

CASAS (Comprehensive Adult Student Assessment System) tests are used to assess student competencies in several areas, including ESL. CASAS tests are also used to document student progress for CalWORKs recipients.

source: GCC Continuing and Community Education Program

Note: The final number of successful completions of high school courses was not available at the time of printing.

2.03.03. Transfer

A primary part of the college's mission is to prepare students for transfer to four-year institutions. The number of students transferring from GCC has fluctuated in the past 15 years, but has tended to increase since 1998. The number of GCC transfers to UC institutions has increased by 71% since 1998-1999. The number of GCC transfers to CSU institutions has increased 67% during the same time period.

^{*} Before 2002-2003, CPEC reported Fall-only transfers to independent institutions. Transfers to UC, CSU, in-state privates, and out-of-state institutions are reported for students entering at any time during the academic year.

The table below shows the number of transfer students to UC and CSU institutions. Most of GCC's transfer students transfer to CSU Northridge and CSU Los Angeles.

Figure 2-24. Number of Transfers to Senior Institutions

	2006-	2007-	2008-
Transfer Institution	2007	2008	2009

The California State University makes information available about transfer student performance at the CSU. Transfer students from GCC generally attain approximately the same GPA at the CSU as the average community college transfer student. Data are shown for upper-division transfers to CSU.

Figure 2-25. Performance of Upper-Division Students Transferring to CSU

	Fall	Fall	Fall	Fall
Performance Measure	2006	2007	2008	2009
Number of CSU Transfers from GCC	464	463	415	464
Pre-Admission GPA of Transfers from GCC	2.96	2.93	2.97	2.91
Fall-to-Fall Persistence of GCC Transfers	87%	88%	88%	
Persistence of All CC Transfers	83%	85%	85%	
CSU GPA of Persisters from GCC	2.98	2.94	2.98	
CSU GPA of Persisters from All CC's	2.93	2.94	2.99	

source: CSU Academic Performance Reports

Note: Performance data for Fall 2009 transfers to CSU were not available in time for publication of the Campus Profile.

Glendale Community College receives information from the National Student Clearinghouse about GCC students who enroll at four-year colleges and universities. In contrast with the retrospective data presented above, in which students enrolling at four-year institutions were tracked back to the two-year college they attended, data from the National Student Clearinghouse allow prospective studies, in which students at GCC can be categorized according to their future enrollments at four-year institutions. The different sources of data give different information about student transfer.

The following table tracks first-time students entering GCC in 2002-2003, 2003-2004, and 2004-2005. Students in each cohort were tracked for six academic years to determine their enrollments at four-year colleges and universities. All enrollments after the student's first term at GCC are counted in the table.

Figure 2-26. Prospective Analysis of GCC Students Enrolling at Four-Year Institutions

	Year Entering GCC			
	2002- 2003	2003- 2004	2004- 2005

CSU Fullerton	18	1	22		

source: National Student Clearinghouse data files

Transfer rates are reported by the California Community Colleges Chancellor's Office using a standard definition. Students who complete 12 or more units and attempt transfer-level English or math within six years of entry at a California community college are tracked to see whether they enrolled at a four-year institution. Chancellor's Office data matches with UC, CSU, and the National Student Clearinghouse, which provides enrollment data for member institutions across the United States, provide transfer information. The transfer rate is the number of students enrolling at a four-year institution within six years divided by the total number of students in the cohort.

Figure 2-28. GCC Transfer Rate

	Entering Cohort			
	2001- 2002- 2 2002 2003			
Transfer Rate				
Glendale Community College	46.4%	48.6%	50.0%	
Region 7 Colleges	38.9%	39.3%	41.2%	
All California Colleges	39.9%	40.2%	40.7%	

2.03.04. Accountability Reporting for the Community Colleges (ARCC)

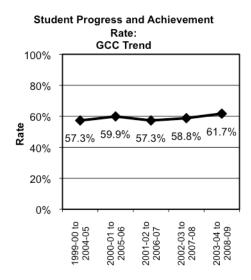

Accountability Reporting for the Community Colleges (ARCC) is an accountability reporting system created in response to Assembly Bill 1417 in 2004. The first report on the performance of community colleges in California was released in January 2007. The following figures summarize GCC's performance on the ARCC indicators.

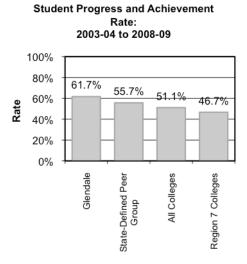

For each indicator, GCC's performance is compared to the performance of four comparison groups: a state-defined peer group specific to that indicator, all community colleges in California, and all colleges in Region 7.

Figure 2-29. ARCC Indicator A: Student Progress and Achievement Rate

"Student Progress and Achievement Rate" is the percentage of first-time students who showed intent to complete and achieved any of the following outcomes within six years: transferred to a four-year institution, earned an AA/AS or certificate of at least 18 units, achieved "transfer directed" status, or achieved "transfer prepared" status.

GCC ranks 6th out of the 23 colleges in the state-defined peer group for Indicator A, and 13th out of the 108 colleges in California for which data were reported. GCC ranks 2nd out of the 14 colleges in Region 7 (after Santa Monica).

source: Chancellor's Office "Focus on Results" Report ARCC Reports

Figure 2-30. ARCC Indicator B: Percent of Students Who Earned at Least 30 Units

"Percent of Students Who Earned at Least 30 Units" is the percentage of first-time students who showed intent to complete and earned at least 30 units in the California community college system. GCC ranks 1st out of the 38 colleges in the state-defined peer group for Indicator A, and 2nd out of the 108 colleges in California for which data were reported. GCC ranks 1st out of the 14 colleges in Region 7.

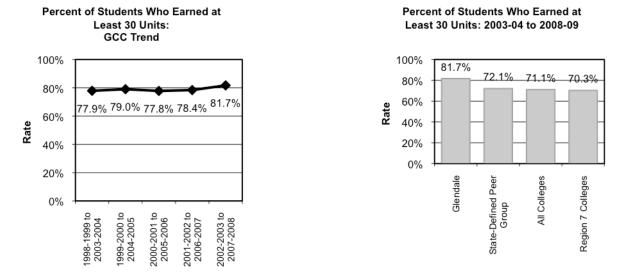

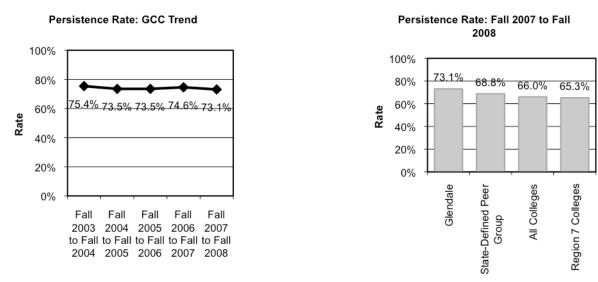

Figure 2-31. ARCC Indicator C: Persistence Rate

"Persistence Rate" is the percentage of first-time students with a minimum of six units earned in a Fall term who enrolled in the subsequent Fall term anywhere in the California community college system. GCC ranks 6th out of the 24 colleges in the state-defined peer group for Indicator A, and 24th out of the 110 colleges in California for which data were reported. GCC ranks 4th out of the 14 colleges in Region 7.

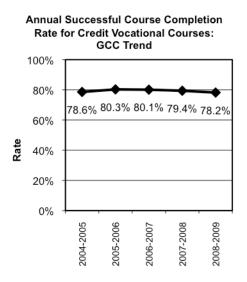

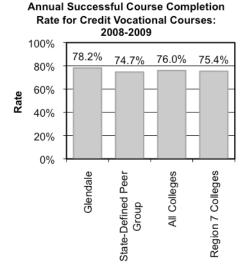

source: Chancellor's Office "Focus on Results" Report ARCC Reports

source: Chancellor's Office "Focus on Results" Report ARCC Reports

Figure 2-32. ARCC Indicator D: Annual Successful Course Completion Rate for Credit Vocational Courses

"Annual Successful Course Completion Rate for Credit Vocational Courses" is the percentage of credit vocational course enrollments that were passed with a grade of A, B, C, or CR. GCC ranks 9th out of the 41 colleges in the state-defined peer group for Indicator A, and 35th out of the 110 colleges in California for which data were reported. GCC ranks 3rd out of the 14 colleges in Region 7, after East LA College and West LA College.

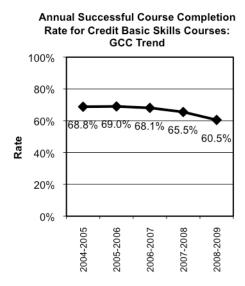

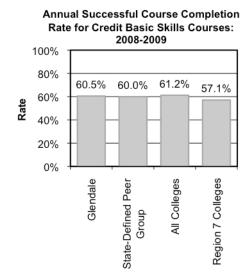

source: Chancellor's Office "Focus on Results" Report ARCC Reports

Figure 2-33. ARCC Indicator E: Annual Successful Course Completion Rate for Credit Basic Skills Courses

"Annual Successful Course Completion Rate for Credit Basic Skills Courses" is the percentage of credit basic skills course enrollments that were passed with a grade of A, B, C, or CR. GCC ranks 7th out of the 13 colleges in the state-defined peer group for Indicator A, and 66th out of the 110 colleges in California for which data were reported. GCC ranks 5th out of the 14 colleges in Region 7.

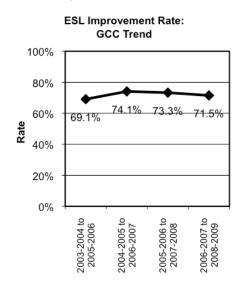

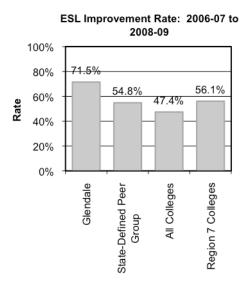

source: Chancellor's Office "Focus on Results" Report ARCC Reports Glendale Community College / Campus Profile 2010

Figure 2-34. ARCC Indicator F: ESL Improvement Rate

"ESL Improvement Rate" is the percentage of students successfully completing a credit ESL course who subsequently passed a higher-level ESL course or a college-level English course within three years. The initial course is two or more levels below a transfer-level course. In the 2010 ARCC report, GCC ranks 6th out of the 22 colleges in its state-defined peer group and 11th out of the 104 colleges in the state for which data were available. GCC ranks 2nd among the 14 colleges in Region 7 on this measure, after Santa Monica.

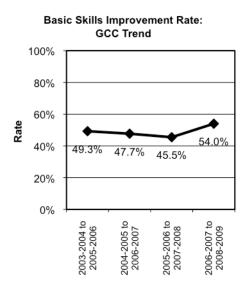

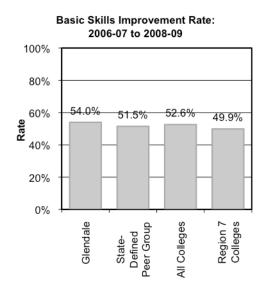

source: Chancellor's Office "Focus on Results" Report ARCC Reports

Figure 2-35. ARCC Indicator G: Basic Skills Improvement Rate

"Basic Skills Improvement Rate" is the percentage of students successfully completing a credit basic skills English or Math course who subsequently passed a higher-level course in the same discipline within three years. The initial course is two or more levels below a transfer-level course. In the 2010 ARCC report, GCC ranks 7th among the 15 colleges in its state-defined peer group and 50th among the 110 colleges for which data were available. GCC ranks 5th out of the 14 colleges in Region 7.

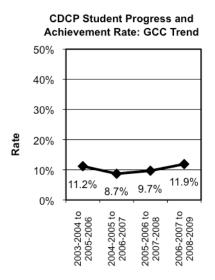

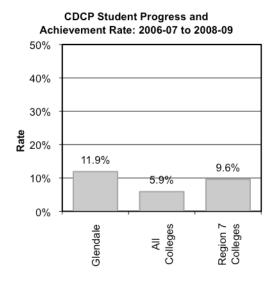

source: Chancellor's Office "Focus on Results" Report ARCC Reports

Figure 2-36. ARCC Indicator H: CDCP Student Progress and Achievement Rate

The newest ARCC indicator is "CDCP Student Progress and Achievement Rate," which measures progress for students taking noncredit courses. CDCP is an acronym for Career Development and College Preparation and refers to a subset of noncredit courses offered by California community colleges. The indicator measures the percentage of first-time students completing at least 8 hours of CDCP courses who either complete a degree-applicable credit course outside PE, earn a CDCP certificate, become transfer directed or transfer prepared, earn an associate degree, or transfer to a four-year institution. Because CDCP offerings vary among community colleges, data are available for only 37 colleges. GCC ranks 5th among the 32 colleges with available data. GCC ranks 4th out of the 14 colleges in Region 7.

source: Chancellor's Office "Focus on Results" Report ARCC Reports

2.03.05. Time to Goal Completion (Student Right-to-Know Data)

The tables below show Student Right-to-Know data, made publicly available by the college and by the Chancellor's Office. Each year, the cohort of entering, full-time, degree-seeking students is identified and tracked for three years to determine the percentage of the cohort completing a goal. By definition, Student Right-to-Know "completers" are those students who have completed a degree or certificate, or who have become transfer prepared by completing at least 56 transferable units with a GPA of 2.0 in those units. (Note: The methodology used to define the cohort changed for the Fall 2000 cohort and again for the Fall 2004 cohort, resulting in a larger cohort and lower success rates.)

"Transfers Out" refers to students who transferred to a four-year institution or to a California community college. The percentage of transfers out is sometimes reported as a transfer rate. It is a flawed measure of transfer because it counts only non-completing students (ignoring those students the college has successfully prepared for transfer) and it includes "transfers" to other community colleges.

Figure 2-37. Student Right-to-Know Data

Glendale Community College						
	Number in	Transfers				
Entering Cohort	Cohort	Out	Completers			
Entering Fall 2001	667	21%	41%			
Entering Fall 2002	355	27%	37%			
Entering Fall 2003	396	10%	43%			
Entering Fall 2004	1,022	21%	31%

Entering Fall 2002	30,444	30%	36%		
Entering Fall 2003		17%	36%		
Entering Fall 2004	86,982	25%	25%		
Entering Fall 2005	128,018	18%	24%		
Entering Fall 2006		17%	25%		

2.03.06. Workforce Preparation

The state of California tracks students who complete community college vocational programs into the workforce. The table below shows workforce placement (employment in the first year after college). Placement rates are measured for "leavers & completers," those students who completed at least one occupational course and earned at least 12 units in a vocational program area, or who earned a vocational degree or certificate, and who are not still enrolled at a community college.

Beginning in 2008, each community college in California must negotiated a performance level for it to meet. The performance level and the differences between the negotiated level and GCC's rates are shown in the table. All data are aggregated across all vocational programs at GCC.

Figure 2-38. Workforce Placement and Retention of GCC Vocational Students

Credit	387,488	677.6	572	406,846	657.0	615	419,405	668.7	627

Source: CCFS 320 and Class Master data files

Notes

- 1. WSCH data for the WSCH per FTEF calculation includes enrollments in classes with weekly, daily, and positive attendance accounting methods, not just weekly classes.
- 2. Due to some inflexibility in the coding of FTEF for certain lab classes, the FTEF reported in the Biology and Physical Sciences divisions are not accurate.
- 3. Health Sciences division FTEF data do not include clinical sessions taught by adjunct instructors. This exclusion underestimates FTEF and overestimates WSCH per FTEF.
- 4. Student Services division FTEF data are coded differently from FTEF data for other divisions, so the Student Services division is not included in the table.

4.03. Funded and Unfunded FTES

Page 63 4.03.01. Funded and Unfunded FTES

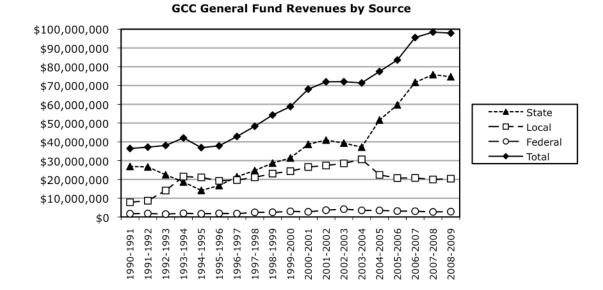

4.01. Revenues

4.01.01. Revenue Sources

The tables below show GCC's revenue sources. About 75% of GCC's general fund revenues come from state sources, compared to about 20% from local sources and 3% from federal sources. The increase in state revenues from 2003-2004 onward is due in part to an accounting shift of \$200 million from deferred apportionment.

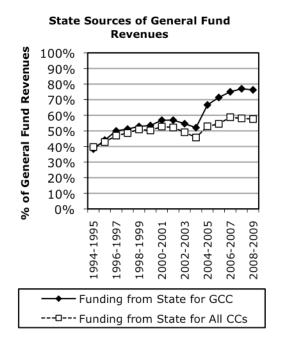

Figure 4-1. General Fund Revenues, Glendale Community College

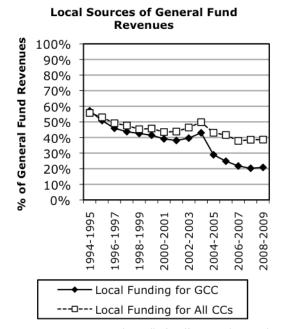

Year	State	Local	Federal	Total
1993-1994	\$18,613,602	\$21,520,265	\$1,957,797	\$42,091,664

Glendale Community College / Campus Profile 2010

Figure 4-2. Percentage of General Fund Revenues by Source, Glendale College

source: Chancellor's Office Fiscal Data Abstracts

Note: The change from 2003-2004 to 2004-2005 in state revenue is high due in part to an "accounting shift of \$200 million from 2003-04 to 2004-05. Chapter 227 (AB 1754), Statutes of 2003, deferred the appropriation of \$200 million until 2004-2005 (\$50 million for Partnership for Excellence and \$150 million for general apportionment)," according to the Chancellor's Office Fiscal Data Abstract for 2004-2005.

4.02.02. Expenditure Comparison to Statewide Averages

The following table shows categories of general fund expenditures. In general, GCC spends a slightly greater percentage of the general fund on salaries and a slightly smaller percentage on benefits, supplies, and materials than the statewide average. In 2007-2008, GCC spent 46% of general fund expenditures on administrative and support functions. The statewide average was 48%.

The table below shows "current expense of education," reflecting unrestricted general fund expenditures for academic salaries, classified salaries, employee benefits, supplies and materials, and other expenses, services, and equipment replacement for instructional, administrative, and support activities. It is required that at least 50% of the current expense of education be expended for salaries of classroom instructors.

4.03. Funded and Unfunded FTES

4.03.01. Funded and Unfunded FTES

The college frequently serves more students than the state funds. The following graph shows the number of Full-Time Equivalent Students (FTES) generated by resident students and the number reported to the state for funding. The difference is "overcap," unfunded, resident FTES.
